In the true sense of the word, low carb is not a diet but rather a long term form of nutrition. The goal is not to achieve rapid and radical changes that later lead to the infamous yo-yo effect but to maintain lasting positive effects on body and mind. However, the change is also big because on average 50-55% carbohydrates land on the plates of the western world. If this percentage is suddenly greatly reduced, this means a major change for the metabolism. However, those who survive the acclimatization phase will be rewarded with improved performance, increased concentration, and weight loss without the risk of relapse. All
