Urban and Regional Planning and Development Rajiv R. Thakur, Ashok K. Dutt, Sudhir K. Thakur, George M. Pomeroy, 2020-02-10 This book discusses urban planning and regional development practices in the twentieth century and ways in which they are currently being transformed. It addresses questions such as What are the factors affecting planning dynamics at local, regional, national and global scales? With the push to adopt a market paradigm in land development and infrastructure, the relationship between resource management, sustainable development and the role of governance has been transformed. Centralized planning is giving way to privatization not only in the traditional regions but also in newly emerging regions of Asia, Africa and Latin America. Further attempts are being made to bring planning related decision making closer to the people who are most affected by it. Presenting a collection of studies from scholars around the world and highlighting recent advances in the field, the book is a valuable reference guide for those engaged in urban transformations whether as graduate students, researchers, practitioners or policymakers.

Business Valuation Across the Industry Life Cycle Adelin Trusulescu, 2025-08-29 This book examines the valuation of internet enabled businesses across their industry life cycles demonstrating the shifts in valuation multiples and drivers over time providing a comprehensive framework to better understand and optimize business valuations. Internet Evolution as Natural Experiment The internet's rise from innovation to necessity driven by 5G and AI offers a unique lens on valuation methodologies across industry life cycles. Methodological Approach Unprecedented quantitative and qualitative research analyzing 1,767 companies globally across 21 industries and 15 years covering 120 multiples, 216 drivers and 100 million data points. Valuation Framework It proposes a groundbreaking framework linking valuation multiples and drivers to industry life cycles illustrating the shift from revenue to profitability based multiples and from growth centric to growth and profitability drivers as companies mature. Practical Implications It concludes with recommendations for stakeholders on monitoring valuation multiples and drivers for value maximizing strategies across virtually all mature and emerging technologies.

A Glocal Town Nicholas Tatsis, 2025-06-30 This book presents a novel theoretical and methodological approach to understanding the emerging glocal realities of sub urban space. Beginning with a study of a suburb of Athens it illustrates the dynamic interaction between the local and the global charting a range of radical social changes as this locality adapts itself to processes of globalization. Moving beyond the Athenian context it shows how the

various traditions of suburban enclaves interact with and confront the impact of external yet pervasive elements of the globalized world for instance through the adoption of events and practices observed in societies across the globe such as Earth Day or International Holocaust Remembrance Day or the use of the global calendar as the polis transforms into a cosmopolis With explorations of this kind A Glocal Town advances a three stage interpretative scheme that enables us to frame glocality more broadly and better understand the global local interaction wherever it occurs As such it will appeal to scholars of sociology geography and urban studies interested in globalization and its interaction with the local in sub urban locales
