Anatomy of Game Design Tom Smith,2024-10-31 People have played games forever but it's only in the past few decades that people really started thinking about what games are how they work and how to make them better Anatomy of Game Design takes some of the most popular and beloved games of all time and dissects them to see what makes them tick By breaking down the systems and content of each game the underlying systems of game design are laid bare Eight games are analyzed including Settlers of Catan Centipede Candy Crush Saga Papers Please Magic The Gathering and more each representing a different genre or era of game design Each game is discussed in detail using the same methods for each game What are the verbs of the game that give the player agency How do those verbs fit together to form a core loop that makes the game engaging What are the systems that power the gameplay What is the larger flow that makes the game interesting over and over again Each game is then used as an example to tie back to one or more larger topics in game design such as systems design randomness monetization game theory and iterative approaches to game development Key Features Uses well known games to provide specific discrete examples of broader game design theory Discusses eight popular games using the same methodology to allow comparison of different types of games Includes both high level theory and academic perspective and practical real world guidance from a working game designer who has created these games for commercial release Provides clear direction for deeper inquiry into game design or related fields such as psychology anthropology game development or systems thinking **MultiMedia Modeling** Duc-Tien Dang-Nguyen,Cathal Gurrin,Martha Larson,Alan F. WORLDBUILDING Julia Stoschek Foundation, 2024-08-06

WORLDBUILDING Gaming and Art in the Digital Age examines the relationship between gaming and time based media art. It is the first transgenerational show of this scope to survey how contemporary artists worldwide are appropriating the aesthetics and technology of gaming as their form of expression. Commissioned by the Julia Stoschek Foundation and curated by Hans Ulrich Obrist, the exhibition features works by more than 50 artists including Rebecca Allen, Cory Arcangel, LaTurbo Avedon, Meriem Bennani, Ian Cheng, Cao Fei, Harun Farocki, Porpentine, Charity Heartscape, Pierre Huyghe, Rindon Johnson, KAWS, Sondra Perry, Jacolby Satterwhite, Sturtevant, and Suzanne Treister. This catalogue is conceptualized as a future standard reference in the field in close collaboration with Hans Ulrich Obrist. In addition to texts by contemporary theorists, curators, and critics on the individual works, a series of newly commissioned contributions will investigate various perspectives on the intersection of gaming and time based media art. This playfully designed volume features rounded edges, a screen printed PVC dust jacket, and kiss cut stickers showing a range of different digital avatars.

Don't Use Your Words! Jane Juffer, 2019-05-28

How children are taught to control their feelings and how they resist this emotional management through cultural production. Today, even young kids talk to each other across social media by referencing memes, songs, and movements, constructing a common vernacular that resists parental, educational, and media imperatives to name their feelings and thus control their bodies. Over the past two decades, children's television programming has provided a therapeutic site for the processing of emotions such as anger, but in doing so has enforced normative structures of feeling that Jane Juffer argues weaken the intensity and range of children's affective experiences. *Don't Use Your Words* seeks to challenge those norms, highlighting the ways that kids express their feelings through cultural productions including drawings, fan art, memes, YouTube videos, dance moves, and conversations while gaming online. Focusing on kids between ages five and nine, *Don't Use Your Words* situates these productions in specific contexts including immigration policy referenced in drawings by Central American children just released from detention centers and electoral politics as contested in kids' artwork expressing their anger at Trump's victory. Taking issue with the mainstream tendency to speak on behalf of children, Juffer argues that kids have the agency to answer for themselves what it feels like to be a kid.

Screenwise Devorah Heitner, 2023-10-10

The second edition of *Screenwise* offers a refreshed, realistic, and optimistic perspective on how to thoughtfully guide kids in the digital age. Many parents feel that their kids are addicted, detached, or distracted because of their digital devices. Media expert Devorah Heitner however believes that technology offers huge potential to our children if parents mentor them. Using the foundation of their own values and experiences, parents and educators can learn about the digital world to help set kids up for a lifetime of success in a world fueled by technology. *Screenwise* is a guide to understanding more about what it is like for children to grow up with technology all around them and to recognizing the special challenges and advantages that contemporary kids and teens experience thanks to this level of

connection In it Heitner presents practical parenting hacks quick ideas that you can implement today that will help you understand and relate to your digital native The new edition includes updated material and additional strategies for parents and caretakers
