*Digital Destiny* Shawn DuBravac, 2015-01-12 Our world is about to change. In *Digital Destiny* How the New Age of Data Will Change the Way We Live, Work and Communicate. Shawn DuBravac chief economist and senior director of research at the Consumer Electronics Association CEA argues that the groundswell of digital ownership unfolding in our lives signals the beginning of a new era for humanity. Beyond just hardware acquisition the next decade will be defined by an all-digital lifestyle and the Internet of Everything where everything from the dishwasher to the wristwatch is not only online but acquiring, analyzing and utilizing the data that surrounds us. But what does this mean in practice? It means that some of mankind's most pressing problems such as hunger, disease and security will finally have a solution. It means that the rise of driverless cars could save thousands of American lives each year and perhaps hundreds of thousands more around the planet. It means a departure from millennia old practices such as the need for urban centers. It means that massive inefficiencies such as the supply chains in Africa allowing food to rot before it can be fed to the hungry can be overcome. It means that individuals will have more freedom in action, work, health and pursuits than ever before.

**Pandemic in the Metropolis**

Anastasia Loukaitou-Sideris, Alexandre M. Bayen, Giovanni Circella, R. Jayakrishnan, 2022-07-22 This book brings together reports of original empirical studies which explore the impacts of the COVID 19 pandemic on urban mobility and transportation and the associated policy responses. Focusing on the California region the book draws on this local experience to formulate general lessons for other regions and metropolitan areas. The book examines how the COVID 19 pandemic has had different impacts on vulnerable populations in cities. It explores the pandemic's impacts on the transportation industry in particular public transit but also on other industries and economic interests that rely on transportation such as freight trucking, retail and food industries and the gig economy. It investigates the effect of the viral outbreak on automobile traffic and associated air quality and traffic safety as well as on alternative forms of work, shopping and travel which have developed to accommodate the conditions it has forced on society. With quantitative data supported with illustrations and graphs transportation professionals, policymakers and students can use this book to learn about policies and strategies that may instigate positive change in urban transport in the post pandemic period.
