Thinking Being: Introduction to Metaphysics in the Classical Tradition Eric Perl, 2014-02-06 In Thinking Being Eric Perl articulates central ideas and arguments regarding the nature of reality in Parmenides Plato Aristotle Plotinus and Aquinas He shows that throughout this tradition these ideas proceed from and return to the indissoluble togetherness of thought and being first clearly expressed by Parmenides The emphasis throughout is on continuity rather than opposition Aristotle appears as a follower of Plato in identifying being as intelligible form and Aquinas as a follower of Plotinus in locating the first principle beyond being Hence Neoplatonism itself a coherent development of Platonic thought comes to be seen as the mainstream of classical philosophy Perl's book thus contributes to a revisionist understanding of the fundamental outlines of the western tradition in metaphysics

The Eclipse of Classical Thought in China and The West James Gordley, 2022-06-09 For centuries the starting points for serious thought about ethics justice and government were traditions founded in China by Confucius and in the West by his near contemporary Socrates In both classical traditions norms were based on human nature to contravene these norms was to deny part of one's humanity The Chinese and Western philosophical traditions have often been regarded as mutually unintelligible This book shows that the differences can only be understood by examining where they converge It describes the role of these traditions in two political achievements the formation of the constitutions of Song dynasty China and the American Republic Both traditions went into eclipse for similar reasons but with quite different consequences in China the growth of absolutism and in the West the inability of modern political and ethical thought to defend the most fundamental values
