nearly as old as human culture itself These are widely used in homes as well as in industry because painted surfaces are
attractive and easy to keep clean Paint is generally made up of a pigment It is a chemical material which alters the color of
reflected or transmitted light due to wavelength selective absorption Varnish is a transparent hard protective finish or film

a thinner or solvent The technology of paints varnishes and enamels is changing rapidly and becoming more complex each
day The paint industry is an important segment of the chemical industry Enamel paint is paint that air dries to a hard usually
glossy finish used for coating surfaces that are outdoors or otherwise subject to wear or variations in temperature The Indian
paint industry has seen a gradual shift in the preferences of people from the traditional whitewash to higher quality paints
like emulsions and enamel paints with improvement in lifestyle India is the second largest consumer of paint in Asia Over the
