Media Diversity and Localism, 2003 **Television Industries** Douglas Gomery, Luke Hockley, 2006-05-31 While not a production study this book attempts to provide an insight into the inner workings of the television industry As such its central concern is with processes not texts or techniques or histories Television Industries focuses on the essential elements of the industry the policy and regulatory frameworks the swiftly changing world of video production technology all of which provides the backdrops against which broadcasters shape and sell their products The book also examines the working practices of scheduling budgeting selling advertising air time and so forth Where issues may be familiar to readers for example debates around public service broadcasting the entries aim to be explanatory and fresh Of course it is not possible to cover every aspect of what is a complex and ever changing industry Nonetheless the aim is to provide a starting point for students and new scholars as they start to research into the nature of the broadcasting industry Hence this volume is extensively cross referenced to guide the reader as they tease out for themselves some of the complexity of this industry There are several other elements that are distinctive about this volume Perhaps the most striking of these is its blend of contributions from the UK and US This book will raise as many questions as it provides answers It aims to make a contribution to the on going debates in the now well established world of television studies with fresh perspectives on some familiar and some not so familiar landscapes Fully illustrated Television Industries is intended as an authoritative and accessible guide to the inner workings of the television industry

Rethinking Media Pluralism Kari Karppinen, 2013-01-29 Access to a broad range of different political

views and cultural expressions is often regarded as a self evident value in both theoretical and political debates on media and democracy Pluralism is commonly accepted as a guiding principle of media policy in addressing media concentration the role of public service media or more recently such questions as how to respond to search engines social networking sites and citizen media However opinions on the meaning and nature of media pluralism as a concept vary widely and definitions of it can easily be adjusted to suit different political purposes Rethinking Media Pluralism contends that the notions of media pluralism and diversity have been reduced to empty catchphrases or conflated with consumer choice and market competition In this narrow logic key questions about social and political values democracy and citizenship are left unexamined In this provocative new book Kari Karppinen argues that media pluralism needs to be rescued from its depoliticized uses and re imagined more broadly as a normative value that refers to the distribution of communicative power in the public sphere Instead of something that could simply be measured through the number of media outlets available media pluralism should be understood in terms of its ability to challenge inequalities and create a more democratic public sphere
