Bezos is equivalent to saying you could ignore Henry Ford or Steve Jobs in the early years of Ford and Apple. These titans monumentally changed how we do business, redefining the rules on a global scale. Amazon founder Jeff Bezos is the new disruptor on the block. He has created a 21st century algorithm for business and societal disruption. He has turned the retail industry inside out, is swiftly dominating cloud computing, media, and advertising, and now has his sights trained on every other domain where money changes hands and business is transacted. But the principles by which Bezos has achieved his dominance—customer obsession, extreme innovation, and long-term management—all supported by artificial intelligence, turning a virtuous cycle flywheel—are now being borrowed and replicated. Bezonomics is for some a goldmine, for others a threat, for still others a life-shaping force, whether they're in business or not.

Brian Dumaine's *Bezonomics* answers the fundamental question: how are Amazon and its imitators affecting the way we live, and what can we learn from them? *Communication Arts*, 2001.

The Core distills Marketing's 22 chapters down to 18, leaving instructors just the content they need to cover the essentials of marketing in a single semester.
