Tim Fox, Scott Spendolini, John Scott

Oracle Application Express 4.2 Installation Guide:

Pro Oracle Application Express John Scott, Scott Spendolini, 2008-10-23 Application Express or APEX is one of the most innovative products to come out of Oracle in years. APEX is an application development framework for developing database backed applications. It's easy enough to get started in that power users can quit storing data in random spreadsheets and instead centralize their data in the powerful Oracle database all without developer help. Developers aren't left out however. Those who choose to do so can go deep and leverage the full power and flexibility of Oracle's database engine. Getting started with APEX is easy; learning how to take full advantage of APEX is the problem. It was the problem that is until this book came along. In *Pro Oracle Application Express* authors John Scott and Scott Spendolini open the hood of APEX and expose the full power behind its easy to use GUI. They show you what you need to know to produce powerful professionally polished applications such as user authentication models, approaches to layout and navigation, how to integrate Ajax, how to deal with localization issues such as time zones and translations, how to customize the look and feel of an APEX web site, and much much more. The authors are well qualified to write on APEX. John Scott runs ShellPrompt, a hosting service that handles many large scale APEX applications, some of which he is paid to develop. John is a hard core APEX developer. His co-author Scott Spendolini is one of the original creators of APEX. Both John and Scott now base their full time careers on developing APEX applications. *Pro Oracle Application Express* is your opportunity to learn APEX from the very best.

Pro Oracle Application Express 4 Tim Fox, Scott Spendolini, John Scott, 2011-11-28 *Pro Oracle Application Express 4* is your key to mastering one of the most innovative products to come out of Oracle in years. Application Express, termed APEX for short, is fast becoming one of the easiest and most widely used of tools for creating enterprise level applications that run against an Oracle database. APEX is easy enough for power users to create ad hoc applications, atop something more reliable than a spreadsheet. Yet APEX is powerful and extensible enough to enable fully scalable enterprise level applications that are accessed by thousands of users. Authors Tim Fox, John Scott, and Scott Spendolini take you to the professional level in developing for Application Express. They show how to handle user authentication in enterprise environments and how to extend APEX by writing components based upon Oracle's new plug-in architecture. You'll learn to deal with localization issues such as time zones and translations and to customize the look and feel of an APEX website to blend in with your corporate branding strategy. The authors also cover web service development, performance and scalability, and the production issues that you encounter in enterprise level deployments. Many years of experience in solving the hard problems are coalesced in this book to help you the reader take advantage of all that APEX has to offer. Focuses on high end enterprise level development. Covers new features such as plug-ins and Websheets. Introduces the new interface released with APEX 4.0.
