Humanity's last chance lies with the biospheres that the mysterious New Tech Corporation has planted across the globe. With resources dwindling and a new, more terrifying form of alien hunting humans down, not all the biospheres will make it. But there is still hope. In Sophie's biosphere, her team has managed to create a magnetic weapon that just might give the human resistance a fighting chance if they can live long enough to use it. Meanwhile, the lone survivor of another failed biosphere treks across the California desert to the ocean and is rescued by an NTC submarine that has been tracking the movements of Sophie's team and the development of their magnetic weapon. An exciting update of the classic alien invasion story, Orbs II weaves together horror, suspense, and science fiction in a thoroughly fresh, modern, unputdownable book.
