## **Ordinary Wisdom Biographical Aging And The Journey Of Life:**

**Ordinary Wisdom** William Lowell Randall, Gary M. Kenyon, 2001 Randall and Kenyon examine the concept of wisdom What wisdom is exactly has vexed thinkers throughout the history of thought Indeed for much of modern times the topic has been taboo given the intellectual climate created by such movements as analytic philosophy behaviorist psychology and cognitive science This study adds to a growing movement that is reclaiming wisdom as a meaningful concept by viewing human development in terms of metaphors that enrich models like mind as computer which proposes mental activity is reducible to processing information Randall and Kenyon's metaphors are life as story and life as journey and their conceptual extension life as adventure ordinary metaphors with extraordinary implications Through the lenses of these intertwining time honored tropes the authors see wisdom not as an unattainable ideal nor as the sole province of experts or educators geniuses therapists or saints Rather it is potentially within the reach of everyone not as a commodity but as a quality of life as a matter of being not of having Insofar as everyone is on a journey and has or is a story everyone has access to an ordinary wisdom which it behooves people to explore and express This book will be of particular interest to scholars students and researchers involved with psychology gerontology theology philosophy and education

**Storying Later Life**

Gary Kenyon, Ernst Bohlmeijer, William L. Randall, 2010-12-20 In its brief but vigorous history gerontology has spawned a broadening range of specializations. One of the newest of such specializations is narrative gerontology so named for its emphasis on the biographical or inside dimensions of the experience of aging. Telling stories about our world our relationships and ourselves is fundamental to how we make meaning. Everything from our history to our religion and our memories to our emotions is linked to the tales we tell ourselves and others about where we have come from and where we are going. They are central to who we are. The biographical side of human life is every bit as critical to fathom as the biological side if we seek a more balanced positive and optimistic perspective on what aging is about if we would honor the dignity and complexity the humanity and uniqueness of the lives of older persons no matter what their health or economic standing. In this respect a narrative approach is particularly suited to the exploration of such topics as meaning spirituality and wisdom and the connections they share. This volume reflects a selection of new directions and insights and constitutes a general broadening and deepening of narrative gerontology exploring its implications for theory and research in the field of aging and for the quality of life of older adults themselves. Such deepening indicates a greater refinement of thought method and intervention. The evolution of narrative gerontology is also evidenced by a significant increase in the number of faculty and graduate students engaged in research in this area as well as by increasing collaboration among researchers practitioners and administrators in applying narrative insights to contexts such as long term care indeed healthcare in general. These initiatives have given rise to the phrase narrative care as core care. Finance and Society in 21st Century China Junie T. Tong, 2011. Finance and Society in 21st Century China considers how far the modern economy is disconnected from Chinese culture and history and questions the common assumption that China has outgrown its reliance on its Western counterparts. Junie Tong applies the work of Belgian economist banker and social commentator Bernard Lietaer in a specifically Chinese context highlighting the need to root finance and enterprise in the rhythms and forces within Chinese culture to avoid future chaos and achieve socioeconomic stability in a country now so critical to global well being. **Journal of Personality**, 2004. **The Encyclopedia of Aging**, 2001. Work contains many cross references and an extensive bibliography. A Poetic Language of Ageing Olga V. Lehmann, Kate de Medeiros, Oddgeir Synnes, 2023-06-15. Exploring the potential of poetry and poetic language as a means of conveying perspectives on ageing and later life this book examines questions such as how can we understand ageing and later life and how can we capture the ambiguities and complexities that the experiences of growing old in time and place entail. As poetic language illuminates transfigures and enchants our being in the world it also offers insights into the existential questions that are amplified as we age including the vulnerabilities and losses that humble us and connect us. Literary gerontology and narrative gerontology have highlighted the importance of linguistic representations of ageing. While the former has been concerned primarily with the analysis of published literary works the latter has foregrounded the individual and collective meaning making through narrative resources in old age. There

has however been less interest in how poetic language both as a genre and as a practice can illuminate ageing This volume suggests a path towards the poetics of ageing by means of presenting analyses of published poetry on ageing written by poets from William Shakespeare to Wallace Stevens the use of reading and writing poetry among ordinary people in old age and the poetic nuances that emerge from other literary practices and contexts in relation to ageing including personal poetic reflections from many of the contributing authors The volume brings together international scholars from disciplinary backgrounds as diverse as cultural psychology literary studies theology sociology narrative medicine cultural gerontology and narrative gerontology and will deploy a variety of empirical and critical methodologies to explore how poetry and poetic language may challenge dominant discourses and illuminate alternative understandings of ageing

### **Critical Perspectives**
