

The background of the cover is a deep blue gradient. Several Moorish Idol fish are depicted swimming. These fish have white bodies with prominent black vertical stripes and bright yellow-green fins. They are characterized by extremely long, thin, white filaments extending from their dorsal and anal fins. The fish are arranged in a loose school, with some in the foreground and others receding into the background, creating a sense of depth. The overall aesthetic is clean and professional, typical of a textbook cover.

The Routledge Companion to Reinventing Management Education Chris Steyaert,Timon Beyes,Martin Parker,2016-06-17 The position and role of the business school and its educational programmes have become increasingly prominent yet also questioned and contested What management education entails and how it is enacted has become a matter of profound concern in the field of higher education and more generally for the development of the organized world Drawing upon the humanities and social sciences The Routledge Companion to Reinventing Management Education imagines a different and better education offered to students of management entrepreneurship and organization studies It is an intervention into the debates on what is taught and how learning takes place demonstrating both the potential and the limits of what the humanities and social sciences can do for management education Divided into six sections the book traces the history and theory of management education reimagining central educational principles and outlining an emerging practice based approach With an international cast of authors The Routledge Companion to Reinventing Management Education has been written for contemporary and future educators and for students and scholars who seek to make a difference through their practice

Perspectives on Change Bernard Burnes,Julian Randall,2015-11-19 Despite the plethora of books on change there appears is a notable gap in the field rarely is the authentic and candid voice of change practitioners heard Seldom are those most closely involved in the management of change given or seek the opportunity to write about

their personal experiences and reflexiveness Nor is this just a case of practicing managers not being given a voice or feeling that they cannot be frank and open about what they do How often do academics candidly state what they actually do when they are faced with managing change in their own institutions or when they are called on in a consultancy capacity Similarly it is rare for full time consultants to be candid about what it is they actually do instead they tend to have a well honed sales pitch which lays out a logical change process directed at helping the client to achieve success Yet when academics consultants and practicing managers are prepared to speak candidly about what they really do a richer messier but more illuminating picture of change emerges The aim of Perspectives on Change is to move beyond the do as I say approach of most change books and to encourage academics consultants and managers to say candidly what it is they really do and what they really think about change and how it should be managed The Editors of this book Burnes and Randall have over 60 years of experience between them of studying and teaching change management acting as consultants and actually managing change projects They are therefore well aware of the differences and contradictions between what academics consultants and managers say about change in public and what they say in private and do in practice Perspectives on Change will offer students and practitioners of change a unique opportunity to understand change in practice In addition it will also contribute to the Rigour Relevance debate by giving a different and perhaps more realistic perspective on the nature of the gap between theory and practice

*Organizational Change in Transition Societies* Josef Langer, Niksa Alfirevic, J Pavicic, 2017-12-04 This book discusses change management paradigms with special reference to examples and cases from the transition societies in Central and Eastern Europe CEE The first chapter analyses developments and trends in the wider societal context of Central and Eastern Europe Theoretical perspectives are applied to understand the processes of transition and EU accession in Central and Eastern Europe Following the second and third chapters the most frequently used tools and procedures of change management are analysed from the perspective of a CEE organization The special advantage of the text to the potential readership is the integration of macro societal and micro organizational points of view towards understanding change The text also provides real life examples and perspectives of understanding and managing change from Central and Eastern Europe which helps the reader to grasp the wider political economic and societal context s of the CEE region
