**Galileo Gleanings VI: Galileo's First Telescopes at Padua and Venice ,**      The Sidereal Messenger (Illustrated Original Edition) Galileo Galilei,2020-11-17 Galileo Galilei had seriously considered the priesthood as a young man at his father s urging he instead enrolled at the University of Pisa for a medical degree 20 In 1581 when he was studying medicine he noticed a swinging chandelier which air currents shifted about to swing in larger and smaller arcs It seemed by comparison with his heartbeat that the chandelier took the same amount of time to swing back and forth no matter how far it was swinging When he returned home he set up two pendulums of equal length and swung one with a large sweep and the other with a small sweep and found that they kept time together It was not until Christiaan Huygens almost one hundred years later however that the tautochrone nature of a swinging pendulum was used to create an accurate timepiece 21 To this point he had deliberately been kept away from mathematics since a physician earned so much more than a mathematician but upon accidentally attending a lecture on geometry he talked his reluctant father into letting him study mathematics and natural philosophy instead 21 He created a thermoscope forerunner of the thermometer and in 1586 published a small book on the design of a hydrostatic balance he had invented which first brought him to the attention of the scholarly world Galileo also studied disegno a term encompassing fine art and in 1588 attained an instructor position in the Accademia delle Arti del Disegno in Florence teaching perspective and chiaroscuro Being inspired by the artistic tradition of the city and the works of the Renaissance artists Galileo acquired an aesthetic mentality While a young teacher at the Accademia he began a lifelong friendship with the Florentine painter Cigoli who included Galileo s lunar observations in one of his paintings Galileo Galilei s Sidereus Nuncius is arguably the most dramatic scientific book ever published It announced new and unexpected phenomena in the heavens unheard of through the ages CONTENTSTo the Most Serene Cosmo De Medici The Second Fourth Grand Duke of TuscanyivThe Astronomical MessengerixIntroduction 1Galileo s account of the invention of his telescope 3Galileo s first observation with his telescope 4Method of determining the magnifying power of the telescope 5Method of measuring

Finocchiaro,1997-05-25 This is a very creative piece of work which merits the highest praise It should be of great value for students and for the general reader I Bernard Cohen author of Guide to Newton s Principia Finocchiaro has done a superb job of presenting Galileo to the modern reader The Dialogue is a work of extreme difficulty requiring a compendious introduction careful selection translation and analysis of texts and thoughtful evaluation of its impact on Western culture With his well known logical ability and a feel for pedagogy rare among scholars Finocchiaro meets these demands in an exceptional way His is a classic introduction to Galileo s masterpiece William A Wallace author of Galileo s Logic of Discovery and Proof I recommend Galileo on the World Systems for any course on Galileo The introduction does a fine job of situating the book in the intellectual climate of the time and the notes make Galileo s prose and arguments thoroughly accessible Albert Van Helden translator of Galileo s Sidereus Nuncius     **The Sidereal Messenger of Galileo** Galilei Galilei,Johannes Kepler,1960     **The Sidereal Messenger** Galileo Galilei,     [The Defense of Galileo ...
