Johnson, Anastasia Salter, 2022-08-26 Educational technology adoption is more widespread than ever in the wake of COVID 19 as corporations have commodified student engagement in makeshift packages marketed as gamification This book seeks to create a space for playful learning in higher education asserting the need for a pedagogy of care and engagement as well as collaboration with students to help us reimagine education outside of prescriptive educational technology Virtual learning

has turned the course management system into the classroom and business platforms for streaming video have become awkward substitutions for lecture and discussion Gaming once heralded as a potential tool for rethinking our relationship with educational technology is now inextricably linked in our collective understanding to challenges of misogyny white supremacy and the circulation of misinformation The initial promise of games based learning seems to linger only as gamification a form of structuring that creates mechanisms and incentives but limits opportunity for play As higher education teeters on the brink of unprecedented crisis this book proclaims the urgent need to find a space for playful learning and to find new inspiration in the platforms and interventions of personal gaming and in turn restructure the corporatized surveilling classroom of a gamified world Through an in depth analysis of the challenges and opportunities presented by pandemic pedagogy this book reveals the conditions that led to the widespread failure of adoption of games based learning and offers a model of hope for a future driven by new tools and platforms for personal experimental game making as intellectual inquiry

Don't Use Your Words! Jane Juffer, 2019-05-28 How children are taught to control their feelings and how they resist this emotional management through cultural production Today even young kids talk to each other across social media by referencing memes songs and movements constructing a common vernacular that resists parental educational and media imperatives to name their feelings and thus control their bodies Over the past two decades children s television programming has provided a therapeutic site for the processing of emotions such as anger but in doing so has enforced normative structures of feeling that Jane Juffer argues weaken the intensity and range of children s affective experiences Don t Use Your Words seeks to challenge those norms highlighting the ways that kids express their feelings through cultural productions including drawings fan art memes YouTube videos dance moves and conversations while gaming online Focusing on kids between ages five and nine Don t Use Your Words situates these productions in specific contexts including immigration policy referenced in drawings by Central American children just released from detention centers and electoral politics as contested in kids artwork expressing their anger at Trump s victory Taking issue with the mainstream tendency to speak on behalf of children Juffer argues that kids have the agency to answer for themselves what does it feel like to be a kid

Regulating the Metaverse Ignas Kalpokas, Julija Kalpokienė, 2023-01-26 The metaverse seems to be on everybody s lips and yet very few people can actually explain what it means or why it is important This book aims to fill the gap from an interdisciplinary perspective informed by law and media and communications studies Going beyond the optimism emanating from technology companies and venture capitalists the authors critically evaluate the antecedents and the building blocks of the metaverse the design and regulatory challenges that need to be solved and commercial opportunities that are yet to be fully realised While the metaverse is poised to open new possibilities and perspectives it will also be a dangerous place one ripe with threats ranging from disinformation to intellectual property theft to sexual harassment Hence the book offers a useful guide to the legal and political governance issues ahead while also contextualising

them within the broader domain of governance and regulation of digital technologies
