*The Politics of Income Taxation* Steffen Ganghof, 2024-10-31 Marginal income tax rates in advanced industrial countries have fallen dramatically since the mid 1980s but levels and progressivity of income taxation continue to differ strongly across countries. This study offers a new perspective on both observations. It blends theoretical inquiry with focused quantitative analysis and in depth investigation of seven countries Germany, Australia and New Zealand as well as Denmark, Finland, Norway and Sweden. The Politics of Income Taxation highlights the equity efficiency tradeoffs that structure the politics of income taxation and analyses how income taxes are embedded in broader tax systems. It explains the limited but enduring importance of political parties and democratic institutions. Finally the study paints a nuanced picture of the role of globalisation and thus sheds light on the pros and cons of tax coordination at European and international levels. **Top Tax**

In The Raging 2020s, for 150 years there has been a contract. Companies hold the power to shape our daily lives. The state holds the power to make them fall in line. And the people hold the power to choose their leaders. But now this balance has shaken loose. As the market consolidates, the lines between big business and the halls of Congress have become razor thin. Private companies have become as powerful as countries. As Walter Isaacson said about Alec Ross's first book, The Industries of the Future, The future is already hitting us and Ross shows how it can be exciting rather than frightening. Through interviews with the world's most
