Shadow Scores Naim Tahir Baig, 2025-11 BOOK DESCRIPTION Shadow Scores How Western Democracies Are Quietly Building Social Credit Empires Beyond China's Shadow While the West recoils at China's Social Credit System a parallel empire of algorithmic surveillance has emerged in liberal democracies hidden in plain sight marketed as efficiency and silently reshaping the foundations of freedom itself In Shadow Scores investigative journalist Dr Naim Tahir Baig exposes how the United States Europe and India have constructed sophisticated social credit architectures that rival and in some ways exceed the systems they publicly condemn From Uber drivers deactivated by opaque algorithms to welfare recipients flagged as fraudulent by AI from predictive policing tools that amplify racial bias to biometric systems that deny food to the hungry this groundbreaking work reveals the creeping authoritarianism hiding behind the facade of technological progress Drawing on over 100 verified sources including court documents policy analyses and interviews with more than 50 affected individuals Baig meticulously documents how gig economy platforms have become unelected governors how Europe's data protection laws contain dangerous blind spots and how India's massive Aadhaar biometric system has created a digital caste hierarchy He traces the

evolution from 19th century credit ledgers to today's all encompassing behavioral scores revealing how Big Tech's lobbying has systematically weakened regulations designed to protect citizens from algorithmic tyranny. But *Shadow Scores* is more than an exposé; it's a call to action. Through vivid case studies of real people trapped in algorithmic poverty cycles denied justice by biased risk assessments and stripped of privacy by surveillance capitalism, Baig illustrates the profound human cost of allowing private corporations to wield governmental power without accountability. He challenges the techno orientalist narrative that frames China as uniquely dystopian while Western democracies quietly deploy similar tools under the guise of efficiency and innovation. This urgent, accessible investigation draws disturbing parallels between science fiction warnings and present day reality, documenting how the invisible ledger of trust maintained by platforms like Uber, Airbnb, and DoorDash, enforced by welfare fraud detection algorithms and legitimized by inadequate regulation, is fundamentally reshaping democracy itself. As artificial intelligence becomes increasingly embedded in decisions about employment, criminal justice, housing, and social services, the question is no longer whether algorithmic governance will define our future but whether we will reclaim democratic control before it's too late. *Shadow Scores* offers both a wake up call and a roadmap for resistance, highlighting successful legal challenges, worker organizing efforts, and policy frameworks that could restore human dignity in an age of machine judgment. Essential reading for anyone concerned about privacy, inequality, racial justice, labor rights, or the future of democracy in the digital age, this book reveals that the greatest threat to freedom may not come from authoritarian regimes abroad but from the algorithmic empires we're building at home, one score at a time.

Enshittification Cory Doctorow, 2025-10-07

Enshittification it's not just you the internet sucks now Here's why and here's how we can disenshittify it We're living through the Enshittocene the Great Enshitting a time in which the services that matter to us that we rely on are turning into giant piles of shit It's frustrating Demoralizing Even terrifying Enshittification identifies the problem and proposes a solution When Cory Doctorow coined the term enshittification he was not just finding a funnier way to say things are getting worse He was making a specific diagnosis about the state of the digital world and how it is affecting all of our lives and not for the better The once glorious internet was colonized by platforms that made all but magical promises to their users and at least initially seemed to deliver on them But once users were locked in the platforms turned on them to make their business customers happy Then the platforms turned to abusing their business customers to claw back all the value for themselves In the end the platforms die Doctorow's argument clearly resonated Once named it became obvious that enshittification is everywhere so much so that the American Dialect Society named it its 2023 Word of the Year and was cited as an inspiration for the 2025 season of Black Mirror Here now in Enshittification the book Doctorow moves the conversation beyond the overwhelming sense of our inevitably enshittified fate He shows us the specific decisions that led us here who made them and most important how they can be undone At the Publisher's request this title is being sold without Digital Rights Management Software DRM applied
