

1 Force Measurement — Student Guide

1.1 Observations

These activities are designed for the beginning of a unit about force and motion. Students will be introduced to the concept of force and measuring this measurement with the metric system. These basic skills are essential for students to understand how mass, force and motion interact. Instructions for the activities are kept simple and as concrete as possible for the corresponding developmental needs of the students. Students will also begin to measure the weight of an object.

1.2 Procedure

These lessons are designed to provide a key student experience with basic gravitation. Please consider the following when preparing this activity for your students: Pre-reading, pre-writing, pre-reading.

Lesson 1: Gravity: Relationships to Objects. This is the first of three lessons on gravity.

Lesson 2: Mass and Weight: Masses in Motion.

Lesson 3: Balance the Balance Beam.

- Is the object's mass proportional to its gravitational pull on the beam?
- Is the object's weight proportional to its mass?
- Is the weight of an object the same on Earth as it is on the Moon?
- How does the mass of an object change if it is on the Moon?
- What is the relationship between weight and mass?
