

[4] Method of null measurement - It is a method of differential measurement. In this method the difference between the value of the quantity to be measured and the known value of the same quantity with which it is compared is brought to zero.

Example: Measurement by potentiometer.

[5] Contact type of measurement - Where the sensing element of measuring device as a contact with medium whose characteristics are being measured.

Example: Coordinate measuring machines (CMM), calipers, micrometers, depth micrometers, gage pins, gage blocks, height gages, surface plates, etc.

[6] Non-Contact type of measurement - The sensor remains untouched with the object whose characters need to be measured.

Example: The optical, radioactive and some of the electrical/electronic measurement belong to this category.
