

Teorema dell'elettore mediano

se le preferenze individuali sono ad un solo massimo
se ogni individuo vota per l'alternativa meno lontana dalla preferita
allora la regola della maggioranza produce sempre un risultato
e il risultato corrisponde alle preferenze dell'elettore mediano

Esempio: un comitato di 13 persone:

6 con preferenze monotoniche decrescenti (α -modali) (imprese)

7 con preferenze quadratiche (uni-modali) (famiglie)

Significato politico: nei sistemi democratici le posizioni di centro dello schieramento politico svolgono un ruolo importante
