The questions that arise are who are using this methodology, how they are using it and why it has not been more spread among companies. This paper tries to answer these questions based on the available literature including the most recent articles on the topic. It has been found that several western companies are catching interest on the methodology but still Triz has deepen its roots among eastern companies. **Magazines in a Digital Lunchbox** Constantin Kawohl, 2011 The first part of this paper compares the iPad with traditional print magazines especially focusing on the advantages of the new technology and its enabling an immersive experience. We live in a world of Big Data and it's getting bigger every day. Virtually every choice we make hinges on how someone generates data and how someone else interprets it, whether we realize it or not. Where do you send your child for the best education? Big Data. Which airline should you choose to ensure a timely arrival? Big Data. Who will you vote for in the next election? Big Data. The problem is the more data we have, the more difficult it is to interpret it. From world leaders to average citizens, everyone is prone to making critical decisions based on poor data interpretations. In *Numbersense*, expert statistician Kaiser Fung explains when you should accept the conclusions of the Big Data experts and
