include on the one hand the role that digital technology has in strengthening our collective intelligence nurturing empathic relations between citizens and democratic institutions and supporting processes of political aggregation deliberation and collaboration On the other hand they comprise the challenges accompanying digital technology for representation transparency and inclusivity in democratic decision making The book's main argument is that digital democratic spaces should be redesigned to narrow the gap between the expectations and outcomes of democratic decision making It suggests abandoning the notion of digital participatory rights as being fast and easy to enjoy It also refutes the notion that digital democratic decision making can only be effective when it delivers rapid and successful responses to the issues of the day regardless of their complexity Ultimately the success or failure of digital democracy will depend on the ability of public regulators to design digital public spaces with a commitment to complexity so as to make them appealing but also effective at engaging citizens
