**Toy Theory** Seth Giddings,2024-11-05 A novel interpretation of the history and theory of technology from the perspective of toys play and play objects Toy Theory addresses the relationships between toys and technology in two distinct but overlapping ways first as underexamined cultural artifacts and behaviors with significant technical attributes and second as playful and toylike dimensions of technology at large Seth Giddings sets out a toy theory of technology that emphasizes the speculative experimental and noninstrumental in technological paradigms and argues that children's playthings rather than being the most ephemeral and inconsequential of technical devices instead offer analytical and anthropological resources for understanding the materiality and imaginaries of technology over time After defining toy theory in general and conceptual terms Giddings examines different types of toys to explore shifting relationships between the microcosmic symbolic or mimetic content material and technical constitution and modes of play of toys and toy related artifacts on the one hand and prevailing macrocosmic technological paradigms and imaginaries on the other Taking a broad historical and genealogical view Giddings traces contemporary postdigital toy and play culture to precedents from the neolithic through to the Enlightenment to consumer culture from the early nineteenth century to the present day
