Engagement Design Nelson Zagalo, 2020-03-17 Interactive media designers have been discussing modes to optimize interaction design beyond mere usability. With the arrival of Emotional Design followed by the success of the User Experience UX approaches, the discussion continued and augmented. Experience has become a complex buzzword which is more about the subject's experience than the product, and this is why it's difficult or even impossible to define it in a concise manner. We propose to move the discussion from Experience towards Engagement to emphasize the design of the relationship between artefacts, contexts, and users. Engagement asks for a more concrete type of experience with specific needs, motives, skills, and competences which can be more clearly worked into the design of artefacts. Engagement also differs from other concepts e.g. fun, enjoyment, happiness, or well-being and is open enough to grant freedom to designers in creating their personal world views. To push this new approach, we offer in this book a full model for the design of engagement in interactive media, still believing it can be applied beyond that. The model is arranged around what we call the three engagement streams: Progression, Expression, and Relation.

It provides considerations of player differences and offers strategies for inclusion, as well as chapters that give platform and context-specific advice. With a wealth of new interviews with industry leaders and contributions from the very best in game UX, the book also includes brand new chapters on Accessibility, Mobile, Game Usability, Data Science, Virtual and Augmented Reality, Esports.
