### **Warped Space**

Anthony Vidler, 2002-02-22 How psychological ideas of space have profoundly affected architectural and artistic expression in the twentieth century

Beginning with agoraphobia and claustrophobia in the late nineteenth century followed by shell shock and panic fear after World War I phobias and anxiety came to be seen as the mental condition of modern life They became incorporated into the media and arts in particular the spatial arts of architecture urbanism and film This spatial warping is now being reshaped by digitalization and virtual reality Anthony Vidler is concerned with two forms of warped space The first a psychological space is the repository of neuroses and phobias This space is not empty but full of disturbing forms including those of architecture and the city The second kind of warping is produced when artists break the boundaries of genre to depict space in new ways Vidler traces the emergence of a psychological idea of space from Pascal and Freud to the identification of agoraphobia and claustrophobia in the nineteenth century to twentieth century theories of spatial alienation and estrangement in the writings of Georg Simmel Siegfried Kracauer and Walter Benjamin Focusing on current conditions of displacement and placelessness he examines ways in which contemporary artists and architects have produced new forms of spatial warping The discussion ranges from theorists such as Jacques Lacan and Gilles Deleuze to artists such as Vito Acconci Mike Kelley Martha Rosler and Rachel Whiteread Finally Vidler looks at the architectural experiments of Frank Gehry Coop Himmelblau Daniel Libeskind Greg Lynn Morphosis and Eric Owen Moss in the light of new digital techniques that while relying on traditional perspective have radically transformed the composition production and experience perhaps even the subject itself of architecture

Arts and Crafts Architecture Peter Davey, 1995 An account of the lives theories and work of the architects of the Arts and Crafts movement which began in England and quickly influenced Europe and America It shows how the ideas of the movement influenced the California and Prairie Schools as well as Art Nouveau Second edition originally published in 1995

**Adrian Stokes** Stephen Kite, 2017-12-02 Adrian Stokes 1902-72 aesthete critic painter and poet is among the most original and creative writers on art of the twentieth century He was the author of over twenty critical books and numerous papers for example the remarkable series of books published in the 1930s The Quattro Cento 1932 Stones of Rimini 1934 and Colour and Form 1937 that embraced Mediterranean culture and modernity His criticism extends the evocative English aesthetic tradition of Walter Pater and John Ruskin into the present endowed by a stern sensibility to the consolations offered by art and architecture and the insights that psychoanalysis affords Indeed for Stokes architecture provides the entree into art and this book is the first study to comprehensively examine Stokes' theory of art from a specifically architectonic perspective The volume explores the crucial experiences through which this architectonic awareness evolved traces the

influence upon Stokes of places texts and personalities and examines how his theory of art developed and matured The argument is supported by appropriate illustrations to confirm the evidence that Stokess claim for architecture as mother of the arts carries the deepest experiential and psychological import    **Gordon Matta-Clark** Stephen Walker,2011-05-10 Known for and even overshadowed by his brutal and spectacular building cuts Gordon Matta Clark s oeuvre is unique in the history of American art He worked in the 1970s on the boarders between art and architecture and his diverse practice is often understood as an outright rejection of the tenets of high modernism Stephen Walker argues instead for the artist s ambivalent relationship with the architectural heritage he is often claimed to disavow thus making this the first book to extrapolate Matta Clark s thinking beyond its immediate context Walker considers the broad range of Matta Clark s ephemeral practice from montage to actual interventions and from performance art and installation to drawing film and video Bringing to the fore the consistent themes and issues explored through this broad range of media and in particular the complex notion of the discreet violation he reveals the continued relevance of Matta Clark s artistic and theoretical oeuvre to the reception of artistic and architectural work today    *The Art of Architecture* Sir Albert Edward Richardson,Hector Othon Corfiato,1952    **Mobility of the Line** Ivana Wingham,2013 The line is the constitutive element of every drawing and forms the core element of any design for art architecture urban design or design in general It resists reduction to simple linearity but rather takes on complex and dynamic forms that attract the viewer in various ways both consciously and suggestively Whether analogue or digital line is mobile as the forces movements and effects that line produce are different for each type of line straight meandering interrupted or even invisible The book is a stimulating celebration of the manifold aspects of line using unique examples from architecture design and art combining interviews with designers and essays by various authors

its colonial territories by focusing on the opposing analytical categories of purity and contamination while also paying attention to their extraordinary theoretical and historical variety Offers new readings of works both canonical e g Michelangelo s unfinished sculptures D rer s Italianate influences and less so e g Vermeyen s tapestries of the Conquest of Tunis Models a new approach to an important epoch in the history of art architecture and culture bringing together the close study of objects e g tapestries sculpture and coins and materials e g cosmetics dyes stone with wider topics such as global exchange and economics Inspires broader questions about the ideological underpinnings of early modernity while also offering new insights into the implications of the current material turn and global turn in the humanities Features twelve essays by leading scholars of the art and architecture of southern and northern Europe the colonial Americas and southeast Asia with correspondingly broad geographical and chronological coverage

**Adolf Loos** Joseph Masheck,2013-03-21

Widely regarded as one of the most significant prophets of modern architecture Adolf Loos was a star in his own time His work was emblematic of the turn of the century generation that was torn between the traditional culture of the nineteenth century and the innovative modernism of the twentieth His essay Ornament and Crime equated superfluous ornament and decorative arts with underclass tattooing in an attempt to tell modern Europeans that they should know better But the negation of ornament was supposed to reveal not negate good style and an incorrigible ironist has been taken too literally in denying architecture as a fine art Without normalizing his edgy radicality Masheck argues that Loos s masterful astylistic architecture was an appreciation of tradition and utility and not as most architectural historians have argued a mere repudiation of the florid style of the Vienna Secession Masheck has reads Loos as a witty ironic rhetorician who has all too often been taken at face value Far from being the anti architect of the modern era Masheck s Loos is an unruly yet integrally canonical artist architect He believed in culture comfort intimacy and privacy and advocated the evolution of artful architecture This is a brilliantly written revisionist reading of a perennially popular architect

**Philip Johnson and His Mischief** Christian Bjone,The Images Publishing Group,2014-04-04 In the world of modern art the idea of appropriation or the conscious manipulation of the recognised world of another artist has long been accepted as a legitimate strategy in criticism of the tradition of art authorship challenging the context of viewing contemporary work and the manipulation of omnipresent media images The world of art itself is fair game to be pillaged or mined in the production of new art but there is almost no recognised equivalent aesthetic in architecture Philip Johnson consistently dealt with the concept of appropriation and used it as a design strategy from the very beginning of his illustrious career A singular taste maker Philip Johnson influenced art architecture and design during the second half of the 20th century Philip Johnson and His Mischief Appropriation in Art and Architecture looks at the concept of appropriation and how Johnson s style was influenced first by his mentor Mies van der Rohe and then by post modern ideas and artists This title serves to review Johnson s body of work and show that far from being a weakness his use of appropriation was a major part of his innovative success **Iteration** Robin Schuldenfrei,2020-04-08 This edited volume
