*Onstage, Or Behind the Scenes? Relative Learning Benefits of Simulation Role-Play and Design* Daniel Druckman,Noam Ebner,2012 In this article the authors report the results of two experiments that explored hypotheses about the relative learning advantages of role play and scenario design The experiments were conducted with similar student populations in Australia and Israel Using a matched pairs design participants were randomly assigned to design and role play conditions They worked on their tasks following an hour long lecture on three negotiation concepts alternatives time pressure and negotiating power A lecture only control group was implemented in the Australian experiment In both experiments designers working behind the scenes indicated better concept learning in the short run than their role play counterparts performing onstage as well as in comparison with the control group They showed better understanding of the way the concepts are related and retained the learning gains over time Moreover the designers were at least as motivated as role players and controls and for the Israel participants showed more motivation The results favoring

designers spread widely across the various questions asked immediately after the experience and 1 week later 86% of the answers given favored designers in terms of direction 52% of these were statistically significant Implications are discussed for explanatory mechanisms programmatic research and teaching training approaches
