*A New Approach to Reading Videogames as Story* Thomas Rowland, 2026-01-27 This book introduces a new methodology for understanding videogames with particular attention to three types of videogames toy games storybook games and ludonarratives This methodology pulls from phenomenological and deconstructionist roots informed by medieval studies and the history of reading to emphasize how important playing stories can be as a form of narrative This book explores the idea of storyplaying in connection with new ideas on intromersive movement game mechanics and sacred play to develop a typology of videogames that will enable critics educators and theorists to situate videogames within a broad continuum of literary history Building on this foundation this book continues by exploring additional facets of this methodology by exploring the relationship between videogames and film criticism the emerging art world of game mediated photography the various economies constructed around videogames the potential of games to serve as third places and some suggestions for videogames in the classroom These ideas are contextualized by the author's argument that videogames serve a purpose akin to the original function of medieval cathedrals as intentional virtual spaces with dedicated and important meditation which given today's decadent cultural and political climate underscores the urgency of recognizing videogames as being vital to our scholarly and educational enterprises

How Video Games Made the Metaverse Kelly Vero, 2026-01-22 This book offers an unflinching look at the creative and structural challenges of storytelling in interactive media Drawing on over 30 years of industry experience Kelly Vero explores the rich interplay between narrative design and technology making the case for why story far from being a cosmetic layer is foundational to player engagement emotional investment and lasting value in games and virtual worlds The book unpacks how narrative design works across different genres and platforms from AAA games and sandbox titles to immersive metaverses offering a toolkit of questions and techniques to help creators build experiences that resonate Vero brings the reader inside the design process examining iterative workflows empathy versus hypothesis testing and the importance of building for diverse evolving user bases She draws from case studies including The Legend of Zelda BTS Universe Story Final Fantasy XIV and even RuneScape's infamous party hat showing how stories are told not just through dialogue but also through User Interface UI environment mechanics and player choice Crucially How Video Games Made the Metaverse From Pixels to Portals is about building worlds that people want to live in Whether you're a product lead a writer or a designer this book explores how to integrate content interaction and community into a unified whole It challenges creators to abandon ego led development and instead embrace deep user understanding as the compass for creative direction By the end readers will understand how to apply storytelling techniques not only to games and metaverses but also to digital products more broadly from loyalty programmes and education platforms to virtual retail and Artificial Intelligence AI companions Vero's reflections on narrative purpose and legacy offer a roadmap for creating digital experiences that matter not just ones that entertain
