Databases and Nutrition, volume III Alessandra Durazzo, Igor Pravst, Massimo Lucarini, 2025-12-10 This Research Topic is dedicated to cover high-level aspects of Databases and Nutrition in a global and interdisciplinary perspective and interoperability as tools towards health. Studies that examine the relationship between diet and health have led to increased interest in all biologically active constituents that are present together with nutrients in food, and data on these as well as other compounds are increasingly required in the database system. Development of a database on compounds of nutritional and nutraceutical character is the main focus of this Research Topic, from construction of dataset throughout standardized and harmonized regional and/or national database until update of Comprehensive Databases. Dedicated dataset and database of a single molecule or and bioactive compounds class are welcome. All steps of production, generation, compilation, and publication of data should be here treated. Setting quality data evaluation index is promoted. Samples and sampling procedure for obtained analytically value for regional and/or national food composition databases should be illustrated. Update of new and reliable data in line with new food and food product on the market is encouraged. Current food composition databases and dedicated databases can contain original analytical values, data taken from published literature, from food labels provided by food manufacturers, or taken from other databases and calculated values. Standardized value documentation procedure for identifying data from literature as well as standardized and harmonized procedures for calculated data, i.e. recipe calculation, should be described. Assessing procedures for yield and retention factors are welcome. Implementation of specific and dedicated databases based on both analytical data and collected data taken from the literature are welcome. Identification and definition of food groups and source of main dietary components are welcome. Examples of food groups classifications and new criteria for definition of food groups should be discussed. Food composition databases should reflect compilation criteria, i.e. representativeness, accuracy of analytical values, data traceability, clarity of description of the food. Standards and guidelines for production and compilation of data

should be promoted The design and construction of food databases requires the identification foods through an adequate food nomenclature and a precise description A consistent food description system is essential when comparing and or exchanging data from different databases and data of same nature from different organizations and countries The use of description and classification systems for coding food items should be illustrated case studies are welcome Development of semi automatic and automatic procedures should be explored Matching procedure for aligning food and nutrient databases across countries and to database in another context i e environment in the perspective of multidisciplinary and integrated approach and interoperability are welcome In this context organization of networks and infrastructures should be promoted Also computational methods and hybrid databases should be encouraged Applications used and benefits of food composition databases and dedicated databases should be explored in this Research Topic Please see our previous volumes Volume I <https://www.frontiersin.org/research-topics/18084/databases-and-nutrition> volume 1 Volume II <https://www.frontiersin.org/research-topics/28203/databases-and-nutrition> volume ii magazine

Digital Organization Tips for Music Teachers Robby Burns, 2016-09-01 Are you a music teacher searching for sanity in the

midst of all your chaotic responsibilities Music teachers have to do so much more than teach music They have to be master musicians educators and conductors all while balancing other professional disciplines like arranging composing trip planning financing and more The parts of the job that take our sights off of great teaching must be managed so that we can focus on what counts the music If you are feeling overwhelmed by the logistics of your job you are in luck there is an app for that Actually a lot of apps And Digital Organization Tips for Music Teachers is here to tell you all about them Whether you can barely turn your computer on or if you are just looking for tips on how to make your work more efficient there is something in store for you The technologies in this book are presented in bite sized descriptions of desktop and mobile apps followed by applications of how they can solve specific problems that music teachers experience every day Each chapter covers a different type of data that music teachers have to organize ranging from notes to tasks to scores and audio recordings

The Metaverse Matthew Ball,2022-07-19 INTERNATIONAL BESTSELLER United States Canada United Kingdom and China Wall Street Journal Associated Press Nielsen Bookscan Publishers Weekly USA Today Toronto Star Globe investigates the role of Web3 blockchains and NFTs and predicts Metaverse winners and losers Most importantly he examines many of the Metaverse s almost unlimited applications The internet will no longer be at arm s length instead it will surround us with much of our lives labor and leisure taking place inside the Metaverse Bringing clarity and authority to a frequently misunderstood concept Ball foresees trillions of dollars in new value and the radical reshaping of society **Broadcasting, Combined with Broadcast Advertising** ,1942 **The Digital Doctor: Hope, Hype, and Harm at the Dawn of Medicine's Computer Age** Robert Wachter,2015-04-10 The New York Times Science Bestseller from Robert Wachter Modern Healthcare s 1 Most Influential Physician Executive in the US While modern medicine produces miracles it also delivers care that is too often unsafe unreliable unsatisfying and impossibly expensive For the past few decades technology has been touted as the cure for all of healthcare s ills But medicine stubbornly resisted computerization until now Over the past five years thanks largely to billions of dollars in federal incentives healthcare has finally gone digital Yet once clinicians started using computers to actually deliver care it dawned on them that something was deeply wrong Why were doctors no longer making eye contact with their patients How could one of America s leading hospitals give a teenager a 39 fold overdose of a common antibiotic despite a state of the art computerized prescribing system How could a recruiting ad for physicians tout the absence of an electronic medical record as a major selling point Logically enough we ve pinned the problems on clunky software flawed implementations absurd regulations and bad karma It was all of those things but it was also something far more complicated And far more interesting Written with a rare combination of compelling stories and hard hitting analysis by one of the nation s most thoughtful physicians The Digital Doctor examines healthcare at the dawn of its computer age It tackles the hard questions from how technology is changing care at the bedside to whether government intervention has been useful or destructive And it does so with clarity insight humor and compassion Ultimately it is a

hopeful story We need to recognize that computers in healthcare don't simply replace my doctor's scrawl with Helvetica 12 writes the author Dr Robert Wachter Instead they transform the work the people who do it and their relationships with each other and with patients Sure we should have thought of this sooner But it's not too late to get it right This riveting book offers the prescription for getting it right making it essential reading for everyone patient and provider alike who cares about our healthcare system *Vanity Fair* ,2016
