On Learning And Knowledge:

Learning & Knowledge Robert McCormick, Carrie Paechter, 1999-03-23 This textbook is founded on the idea of learning as knowledge construction and the implications of this for the nature of knowledge and for the way it is acquired. The first section examines the nature of knowledge from several perspectives. The dominant theme is that views of learning closely relate to views of knowledge. The second section considers what it is to be knowledgeable. Expertise and types of knowledge are considered using examples from different phases of education and subject areas. The final part of the book focuses on learning within domains and what this means from different subject perspectives. Learning and Knowledge is a Course Reader for The Open University course E836 Learni

Knowing Knowledge George Siemens, 2006 Why does so much of our society look as it did in the past? Our schools, our government, our religious organizations, our media, while more complex, have maintained their general structure and shape. Classroom structure today, with the exception of a computer or an LCD projector, looks remarkably unchanged. Teacher at the front, students in rows. Our business processes are still built on theories and viewpoints that existed over a century ago, with periodic amendments from thinkers like Drucker. 2 In essence, we have transferred not transformed our physical identity to online spaces and structures

Knowledge, Education and Learning Lars Qvortrup, 2006 Present day society is often referred to as a knowledge society. But how can knowledge be defined and what role does it play along with the related or connected concepts of learning and media? ICT In what sense does learning lead to knowledge? What forms of learning are adequate in the so-called knowledge society and how are appropriate forms of learning underpinned? How should media be conceptualised and what is the role of the media, not least digital media, i.e. ICT, in society? Most people seem to agree that we live in a knowledge society. But what is knowledge and how can knowledge be categorised? How does learning and life long learning help us making knowledge society a reality and what is the role of e-learning? The book aims at answering all these basic questions. It provides a definition and logical categorisation of knowledge. It categorises learning and teaching in a similar system. It analyses media, education, media, socialisation and the use of digital media in and for teaching. It summarises the main theories of e-learning. And it presents the German sociologist Niklas Luhmann's theory of the educational system. The book is written for everybody who works professionally with education, knowledge and knowledge management, including educational researchers, e-learning specialists, teachers and students at teacher training colleges and for everybody interested in understanding the so-called knowledge society

Enablers of Organisational Learning, Knowledge Management, and Innovation Preethi Kesavan, 2020-11-20 This book establishes constructivist, interpretivist and linguistic approaches based on conventions about the nature of qualitative and text data. The author's influence on text interpretation and the validity checks used to justify text interpretations. Vast quantities of text and qualitative data in organizations often go unexplored. Text analytics outlined in this book allow readers

to understand the process of converting unstructured text data into meaningful data for analysis in order to measure employee opinions feedback and reviews through sentiment analysis to support fact based decision making The methods involve using NVivo and RapidMiner software to perform lexical analysis categorization clustering pattern recognition tagging annotation memo creation information extraction association analysis and visualization The methodological approach in the book uses innovation theory as a sensitizing concept to lay the foundation for the analysis of research data suggesting approaches for empirical exploration of organizational learning knowledge management and innovation practices amongst geographically dispersed individuals and team members Based on data obtained from a private educational organization that has offices dispersed across Asia through focus group discussions and interviews on these topics the author highlights the need for integrating organizational learning knowledge management and innovation to improve organizational performance exploring perspectives on collective relationships and networks organizational characteristics and structures and tacit and overt values which influence such innovation initiatives In the process the author puts forward a new theory which is built on three themes relationship and networks knowledge sharing mechanisms and the role of social cognitive schema that facilitate emergent learning knowledge management and innovation

Shedding New Lights on Organisational Learning, Knowledge and Capabilities Joaquin Alegre,Ricardo Chiva,Anabel Fernandez-Mesa,2014-06-30 Research on organisational learning knowledge and capabilities has indeed become one of the most fruitful and interesting areas in the field of management and has not only improved our understanding of organisations but also helped them to face the new challenges of our turbulent age Are our organizations learning to face a new age What kinds of learning and knowledge are necessary to understand our age What new lights can help us to understand organisational learning and knowledge Are there shades *Shedding New Lights* dispels uncertainties and provides a better observation and understanding of this particular phenomenon This book includes an overview of the

major topics on organisational learning knowledge and capabilities There are three parts the first focuses on organisational learning and particularly on practice and communities of practice The second part deals with knowledge creation and transfer two main knowledge management processes that are extremely relevant for firm performance Finally the third part examines the phenomenon of ambidexterity explorative and exploitative learning and the absorptive capacity of the firm

Knowledge and Practice Patricia Murphy, Robert McCormick, 2008-07-18 Longstanding cultural heritages about the nature of knowledge continue to dominate Western education Yet the ways of knowing represented through teaching and workplace practices including assessment and their relationship to views of learning are often ignored in debates about learning This book provides a rich collection of readings that challenge traditional understandings of knowledge and the view of mind that underpins them It offers socioculturally informed alternatives and tools for innovating change and transforming practice that value different ways of knowing embracing those that learners bring to educational and workplace settings The book takes forward thinking about curriculum in a number of unique and important ways It adopts a relational view of learning and knowledge covers educational and workplace learning and examines knowledge from a sociocultural perspective where learner identities are conceived as forms of competency or knoweldge It presents challenging ways of thinking about knowledge and learning and considers how to enact these in practice Drawing from the international literature this book will be essential reading for students of curriculum learning and assessment in all sectors from primary to further and higher education It is suitable as a core text for masters and taught doctorate programmes It will also be of interest to a wide range of professionals involved with the processes of curriculum learning and the practice of teaching and assessment It will be relevant to those in work based and professional education and training and informal educationsl settings as well as traditional educational institutions at all levels A unique collection in a field that is underrepresented it will also be of interest to an academic audience **On Learning, Volume 3** David Scott, 2025-02-03 Moving beyond test scores and outcomes this volume redefines what it means to learn by intertwining ideas from philosophy mathematics and social theory What does it mean to learn In On Learning Volume 3 Knowledge Curriculum and Ethics David Scott probes the intricate relationship between knowledge and learning questioning reductionist and empiricist perspectives that dominate contemporary education This volume like the first two in the series critically analyzes the philosophical and ethical dimensions of learning pushing beyond simplified notions of curriculum and assessment Scott ties in a range of key concepts including epistemology and critical realism to offer a profound rethinking of what it means to know and engage with the world At the heart of this book is a call to recognize that learning is not merely a mechanical process or a set of measurable outcomes but a deeply human and ethical endeavor On Learning Volume 3 urges readers to reconsider the structures that shape education today and invites us to rethink how we understand knowledge and learning and the values that underpin them **On Learning, Volume 3** David Scott ,2025-02-04 This book as you can see from its title is about learning or at

least about the concept and practice of learning It investigates two meta concepts knowledge and learning the relationship between the two and the way these can be framed in epistemic social political and economic terms Knowledge and learning as meta concepts are positioned in various networks of meaning principally the antecedents of the concepts their relations to other relevant concepts and the way the concepts are used in the lifeworld This book explores a number of important concepts that are relevant to the idea of learning These are meta concepts such as epistemology semantics phenomenology rationality thinking hermeneutics critical realism and pragmatism and meso concepts such as a Bildung justification mathematical concepts such as averaging probability comparison prediction and correlation a bureaucratic theory of learning social categories of learning and knowledge and the relationship between ethics and learning On Learning Volume 3 Knowledge curriculum and ethics like the first two volumes is a response to empiricist and positivist conceptions of knowledge The author challenges detheorised and reductionist ideas of learning that have filtered through to the management of our schools colleges and universities over simplified messages about learning knowledge curriculum and assessment and the denial that values are central to understanding how we live and how we should live Praise for On Learning Volume 3 With this third volume of his trilogy on learning and written with the exemplary rigour clarity and incisiveness that are now trademarks of his David Scott cements his reputation as one of the world's leading philosophers of education Those who wish to learn about learning are much in David's debt Ronald Barnett UCL This third book in Scott's series on theorising and discussing the lived experience as learning offers a comprehensive capstone to his work The book shares with the others his perceptive imaginative and informed scholarship in a well argued and original text Its contribution to the literature ought to be assured Paul Gibbs Middlesex University Like the two previous volumes in this series this book is a radical inquiry in the sense that it probes the rich depths of the innumerable ways human beings relate to a complex world This book challenges a view of learning that is cloaked in the language of behaviour and outcomes as being best reserved for animal training Tone Saevi VID Specialized University Norway *Knowledge and Schooling* Richard Pring, 1976 *On learning and knowledge* Jiddu Krishnamurti,

Knowledge Management and Management Learning: Walter R.J. Baets, 2005-10-27 Knowledge Management and Management Learning Extending the Horizons of Knowledge Based Management examines a range of topical considerations in the field by utilizing dynamic and non linear systems behavior or the complexity paradigm From this examination have come a number of new and promising relevant extensions to knowledge management and its practice Many of the topics have been pulled from real world situations in actual companies and therefore these topical treatments reflect quantitative and qualitative research done within the knowledge management framework of actual company experience Offered are a series of topical treatments that extend the parameters of knowledge management and examine the practical implications of these extensions The book begins with an extended introduction and theoretical framework The contributing authors have written chapters that add to both the framework and the practical

consequences of knowledge management Within this context the book illustrates why and how of knowledge management is important for companies **The Role of Subject Knowledge in the Early Years of Schooling** Carol Aubrey,2024-11-07

Originally published in 1994 the aim of the authors was to provide a comprehensive introduction to recent advances in research which had been made in learning and teaching in the early years of schooling at the time Emphasis is placed on how subject knowledge is constructed or acquired and the organization of teaching to promote the learner s active construction of meaning through the integration of new knowledge with existing understanding The National Curriculum is founded in subject knowledge though little examination appears to have been made of this in terms of how subject matter is transformed into the content of teaching that young children can understand It this remains for the teacher to develop instruction through the creation of a curriculum content and sequence which both reflects and advances the structure of existing forms of representation problem solving and knowledge which the child brings to the school The whole thrust of the book challenges the conventional early years ideology with its emphasis on child centred concrete and empirical approaches to learning with a view of teaching which is concerned with making sense of children s understanding and allowing their active construction of knowledge and information processing to develop expertise in context **Knowledge: Its Creation, Distribution and**

Learning in Information-Rich Environments Delia Neuman,2014-08-23 The amount and range of information available to today s students and indeed to all learners is unprecedented Phrases like the information revolution the information or knowledge society and the knowledge economy underscore the truism that our society has been transformed by virtually instantaneous access to virtually unlimited information Thomas Friedman tells us that The World Is Flat and that we must devise new political and economic understandings based on the ceaseless communication of information from all corners of the world The Bush administration tells us that information relating to the war on terrorism is so critical that we must allow new kinds of surveillance to keep society safe Teenage subscribers to social computing networks not only access information but enter text and video images and publish them widely becoming the first adolescents in history to be creators as well as consumers of vast quantities of information If the characteristics of the information age demand new conceptions of commerce national security and publishing among other things it is logical to assume that they carry implications for education as well In fact a good deal has been written over the last several decades about how education as a whole must transform its structure and curriculum to accommodate the possibilities offered by new technologies Far less has been written however about how the specific affordances of these technologies and the kinds of information they allow students to access and create relate to the central purpose of education learning What does learning mean in an information rich environment What are its characteristics What kinds of tasks should it involve What concepts strategies attitudes and skills do educators and students need to master if they are to learn effectively and efficiently in such an environment How can researchers theorists and practitioners foster the well founded and widespread development of such key elements of the learning process This book explores these questions and suggests some tentative answers Drawing from research and theory in three distinct but related fields learning theory instructional systems design and information studies it presents a way to think about learning that responds directly to the actualities of a world brimming with information The book is grounded in the work of such key figures in learning theory as Bransford and Anderson Krathwohl It draws on such theorists of instructional design as Gagne Mayer and Merrill From information studies it uses ideas from Buckland Marchionini and Wilson who is known for his pioneering work in information behavior that is the full range of information seeking and use The book breaks new ground in bringing together ideas that have run in parallel for years but whose relationship has not been fully explored Strategies of Research on Learning in Educational Settings Philip Hunter DuBois,King M.
