depth critical and strategic understanding of the fashion industry's legal intricacies *Digital Twin Driven Intelligent Systems and Emerging Metaverse* Enis Karaarslan, Ömer Aydın, Ümit Cali, Moharram Challenger, 2023-04-08 This book covers the notion of the digital twin which has the potential to alter the way systems are governed and manufactured. It also addresses the metaverse as an emerging technology with its roots in literature, cross-platform avatars, and artificial intelligence-oriented cybersecurity issues. The untapped potential of the metaverse and digital twins as enabling technologies for the next generation industries is emphasized in various chapters. Digital twin technology enables manufacturers to comprehend their products throughout product design, better integrate simulation, tracking, and optimization in real time, and appropriately analyze operations. Especially for complicated products or systems, testing on a digital twin is more efficient, more accessible, quicker, less error-prone, and less expensive. The product is examined in its virtual version before it is displayed in the actual world. Additionally, the digital twin minimizes operational expenses and increases the longevity of equipment and assets. By prolonging the life of the thing they represent and enhance its working efficiency, it may minimize operating costs and prospective capital spending. The digital twin idea is becoming a reality as it has begun to be used in several industries including energy, manufacturing, construction, transportation, aerospace, smart cities, healthcare, cyber security, finance, and agriculture. Academic and industrial experts highlighted the most compelling use cases of digital twins and metaverses and the challenges inherent in their implementation. Readers who want to make more effective systems will find the book useful. Also, people who want to get an idea and vision of how technology will change our lives will benefit from this book. **Metaverse Communication** Prasanna Bhattathiri, 2025-01-03

Metaverse Communication: Redefining Connections delves into the transformative potential of the Metaverse. This book explores whether the Metaverse can truly become a space for life-changing experiences and interactions surpassing the current Internet. We define the Metaverse as a shared 3D virtual space that combines elements of the digital and physical worlds. This book examines whether technology can overcome infrastructure challenges, corporate greed, and physical limitations to create a continuously shared virtual universe. We highlight key industry insights such as Facebook's rebranding to Meta and its significant investment in the Metaverse. With predictions like Bloomberg's estimate of an 800 billion Metaverse market by 2024, the book discusses the enormous economic and social potential of this new frontier. *Metaverse Communication: Redefining Connections* provides a clear authoritative guide to understanding the Metaverse, its applications, and its implications for the future of communication and interaction. *Regulating the Metaverse* Ignas Kalpokas, Julija Kalpokienė, 2023-01-26 The metaverse seems to be on everybody's lips, and yet very few people can actually explain what it means or why it is important. This book aims to fill the gap from an interdisciplinary perspective informed by law and media and communications studies. Going beyond the optimism emanating from technology companies and venture capitalists, the authors critically evaluate the antecedents and the building blocks of the metaverse, the design and regulatory challenges that need to be solved, and commercial

opportunities that are yet to be fully realised While the metaverse is poised to open new possibilities and perspectives it will also be a dangerous place one ripe with threats ranging from disinformation to intellectual property theft to sexual harassment Hence the book offers a useful guide to the legal and political governance issues ahead while also contextualising them within the broader domain of governance and regulation of digital technologies **BrandTelling** Francesco
