Electric Charging Intended Functionality, Availability, and Equity Inclusion Brian J. Kozumplik, 2023-01-19 As unprecedented growth in EV sales is expected and the number of public charging stations must be planned accordingly as charger up time and functionality i.e. availability is the number one factor for users once the charging system is installed Electric Vehicle Intended Functionality Availability and Equity Inclusion informs current customers and potential purchasers of functionality availability and equity inclusion issues with EV charging systems currently in production and in use across North America and Europe Note that if shortages of available chargers are recognized and exposed across the US this could then have a negative impact on future potential EV customers from making the leap from traditional ICE vehicles to EVs Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2023001> *Electric Vehicle Recharge Time, Reliability, and Interoperability* Brian J. Kozumplik, 2022-12-15 As more consumers and operators adopt electric vehicles EVs as personal and fleet vehicles questions regarding recharge time reliability and interoperability of EV supply equipment and charging systems currently in use across North America and Europe remain The current lack of understanding has led to consumer anxiety and in some cases inadvertent abuse and mishandling of electric supply equipment Electric Vehicle Recharge Time Reliability and Interoperability navigates issues such as charging equipment reliability the complexity Interoperability concerning charging networks EVs and payment systems various public and private charging network issues and lagging regulations and standards While many challenges need to be addressed this report also identifies the improvements made since early adoption of EV charging technology as well as ongoing efforts to improve it further Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2022028> **ITF Transport Outlook 2023** International Transport Forum, 2023-05-24 The ITF Transport Outlook 2023 examines the impacts of different policy measures on global transport demand and carbon dioxide CO2 emissions to 2050 [The Bhutan Electric Vehicle Initiative](#) Da Zhu, Dominic Pasquale Patella, Roland Steinmetz, Pajnapa Peamsilpakulchorn, 2016-04-06 As the country that inspires the world with gross national happiness development philosophy Bhutan is striving to pursue its economic growth while committing to its core values of inclusive and green development Even with robust economic growth rates Bhutan's dependence on imports and hydropower revenues drives the country to search for self-reliant option to fuel the economy while further decarbonizing the economy Electric vehicle is being explored as one of the key policies to introduce green mobility reduce fossil fuel imports and put the country firmly on a green growth path Globally electric vehicles market and technology are still in the nascent stage but are developing rapidly The automotive industry has adopted electrification as a pillar of future drive train technology EV uptake is expected to increase significantly with ongoing improvements in technology and resulting cost decreases in the global market This report aims to help Bhutan think through various technical and policy issues of introducing electric vehicles in its own context It analyses a variety of factors that will impact adoption of

electric vehicles from technical market and financial feasibility to consumer awareness and stakeholders capacity It also addresses several policy questions which are at the heart of public debate such as affordability of the government to undertake the program economic costs and benefits distributional impact fiscal and macroeconomic implications Drawing from vast international experiences the report examines in great technical details how global cutting edge technology like electric vehicles could be pursued in the context of developing economies with different socio economic characteristics and constraints compared to advanced economies It will help readers better grasp the technical financial economic and social challenges as well as opportunities in initiating electric vehicles program and provide practical recommendations that will be useful for policy makers in designing their own EV initiative [The Energy Disruption Triangle](#) David C.
