*The Secret of Social Media: A New Business Direction* Dr. Jagdish Pareek, This book is specially designed and support our fighter who work for our community and Who believe in education preventive health employment help and social entrepreneurship As 21st century now marketing and leads generation depends on social media knowledge this book supports our all leaders to make strong team in every district of India Mission 1 crore volunteer across India may achieve before if every leader of community use mentioned trick in their day to day marketing practice

*The Digital Age and Its Discontents* Matteo Stocchetti, 2020-08-11 Three decades into the digital age the promises of emancipation of the digital revolution in education are still unfulfilled Furthermore digitalization seems to generate new and unexpected challenges for example the unwarranted influence of digital monopolies the radicalization of political communication and the facilitation of mass surveillance to name a few This volume is a study of the downsides of digitalization and the re organization of the social world that seems to be associated with it In a critical perspective technological development is not a natural but a social process not autonomous from but very much dependent upon the interplay of forces and institutions in society While influential forces seek to establish the idea that the practices of formal education should conform to technological change here we support the view that education can challenge the capitalist appropriation of digital technology and therefore the nature and direction of change associated with it This volume offers its readers intellectual prerequisites for critical engagement It addresses themes such as Facebook s response to its democratic discontents the pedagogical implications of algorithmic knowledge and quantified self as well as the impact of digitalization on academic profession Finally the book offers some elements to develop a vision of the role of education what should be done in education to address the concerns that new communication technologies seem to pose more risks than opportunities for freedom and democracy
