Key Features: Reduce the model building time by applying optimization techniques and approaches. Harness the computing power of multiple devices and machines to boost the training process. Focus on model quality by quickly evaluating different model configurations. Purchase of the print or Kindle book includes a free PDF eBook. Book Description: This book, written by an HPC expert with over 25 years of experience, guides you through enhancing model training performance using PyTorch. Here you'll learn how model complexity impacts training time and discover performance tuning levels to expedite the process as well as utilize PyTorch features, specialized libraries, and efficient data pipelines to optimize training on CPUs and accelerators. You'll also reduce model complexity, adopt mixed precision, and harness the power of multicore systems and multi-GPU environments for distributed training. By the end, you'll be equipped with techniques and strategies to speed up training and focus on building stunning models. What you will learn: Compile the model to train it faster. Use specialized libraries to optimize the training on the CPU. Build a data pipeline to boost GPU execution. Simplify the model through pruning and compression techniques. Adopt automatic mixed precision without penalizing the model's accuracy. Distribute the training step across multiple machines and devices. Who this book is for: This book is for intermediate-level data scientists who want to learn how to leverage PyTorch to speed up the training process of their machine learning models by employing a set of optimization strategies and techniques. To make the most of this book, familiarity with basic concepts of machine learning, PyTorch, and Python is essential. However, there is no obligation to have a prior understanding of distributed computing, accelerators, or multicore processors.

Deep Learning Stephane Tuffery, 2022-11-14 DEEP LEARNING: A concise and practical exploration of key topics and applications in data science. In *Deep Learning From Big Data to Artificial Intelligence with R*, expert researcher Dr. Stephane Tuffery delivers an insightful discussion of the applications of deep learning and big data that focuses on practical instructions on various software tools and deep learning methods, relying on three major libraries: MXNet, PyTorch, and Keras. TensorFlow. In the book, numerous up-to-date examples are combined with key topics relevant to modern data scientists, including processing optimization, neural network applications, natural language processing, and image recognition. This is a thoroughly revised and updated edition of a book originally released in French, with new examples and methods included throughout. Classroom tested and intuitively organized, *Deep Learning From Big Data to Artificial Intelligence with R* offers complimentary access to a companion website that provides R and Python source code for the examples offered in the book. Readers will also find a thorough introduction.
