**Charles Bloszies**

## **Old Buildings New Designs Architectural Transformations Architecture Briefs:**

Old Buildings New Designs Charles Bloszies, 2013-07-02 Increasingly architects are hired to design new work for existing structures. Whether for reasons of preservation, sustainability or cost effectiveness the movement to reuse buildings presents a variety of design challenges and opportunities. *Old Buildings New Designs* is an Architecture Brief devoted to working within a given architectural fabric from the technical issues that arise from aging construction to the controversy generated by the various project stakeholders to the unique aesthetic possibilities created through the juxtaposition of old and new.

**Old Buildings, New Designs** Charles Bloszies, 2012-19 Eksempler på genbrug af gamle bygninger med tilbygninger i nyt arkitektonisk design. Writing About Architecture Alexandra Lange, 2012-03-20 Extraordinary architecture addresses so much more than mere practical considerations. It inspires and provokes while creating a seamless experience of the physical world for its users. It is the rare writer that can frame the discussion of a building in a way that allows the reader to see it with new eyes. *Writing About Architecture* is a handbook on writing effectively and critically about buildings and cities. Each chapter opens with a reprint of a significant essay written by a renowned architecture critic followed by a close reading and discussion of the writer's strategies. Lange offers her own analysis using contemporary examples as well as a checklist of questions at the end of each chapter to help guide the writer. This important addition to the *Architecture Briefs* series is based on the author's design writing courses at New York University and the School of Visual Arts. Lange also writes a popular online column for *Design Observer* and has written for *Dwell*, *Metropolis*, *New York* magazine and *The New York Times*. *Writing About Architecture* includes analysis of critical writings by Ada Louise Huxtable, Lewis Mumford, Herbert Muschamp, Michael Sorkin, Charles Moore, Frederick Law Olmsted and Jane Jacobs. Architects covered include Marcel Breuer, Diller Scofidio, Renfro, Field Operations, Norman Foster, Frank Gehry, Frederick Law Olmsted, SOM, Louis Sullivan and Frank Lloyd Wright.

**Cultural Heritage Preservation for Vulnerable Territories** Francesco Augelli, Matteo Rigamonti, 2024-08-30 This book frames the many-sided fragilities of Hunan Province's Heritage. It originates from a ten-year-long international cooperation between Politecnico di Milano, Italy, dealing from the Seventies with architectural preservation and adaptive reuse's teaching and research activities, and the School of Architecture of the Hunan University of Changsha, China. From the Preservation of Landscape Heritage to Historical cities and settlements' preservation and ancient and modern architecture preservation, the tangible and intangible cultural heritage protection and valorization from the social repercussions to the environmental issues, the contributions introduce different aspects of Hunan territory's cultural richness and fragility. The common aim of the rich mosaic of case studies presented at different scales is mapping, understanding, and considering the weaknesses of sites to be addressed sustainably. This is done while seeking cultural resilience-driven preservation solutions regarding operational guidelines and policies, risk assessment, social awareness, and teaching innovation. There is also a focus on virtuous multi-scale management of advanced digital technologies used to describe the

current conditions and to drive the compatible design methodology on cultural heritage **Sustainable Design** David Bergman,2013-07-02 Written for students and practitioners in the fields of architecture and interior design our new Architecture Brief Sustainable Design provides a concise overview of all the techniques available for reducing the energy footprint of structures and spaces With clear simple language and a practical can do approach author David Bergman covers everything from the profession s ethical responsibility to design structures and spaces that sustain our natural resources to specific considerations such as rainwater harvesting graywater recycling passive heating techniques solar orientation green roofs wind energy daylighting indoor air quality material evaluation and specification and how to work with green building certification programs

**Urban Composition** Mark C. Childs,2013-07-02 Cities and towns are among humanity s greatest achievements yet no single individual or organization creates them The buildings streets and gardens of even a small town embody substantial investments of money natural resources and political capital Much more than the sum of its parts a settlement s vitality comes from its collective composition Sometimes the cities and towns that emerge are glorious places but too frequently they have only fragments of greatness or are soulless and environmentally unhealthy Our new Architecture Brief Urban Composition shows architects planners artists and engineers of individual projects how they can best fulfill their public trust to help make meaningful urban places Each chapter contains a set of design queries followed by a discussion illustrations and references for further research This accessible primer on urban design provides guidelines for designing buildings or plans for large cities or small towns Urban Composition showcases projects across the United States and internationally in metropolitan areas such as Chicago Seattle and London and small communities such as Marfa Texas

**Material Strategies** Blaine Brownell,2013-07-02 Blaine Brownell s best selling Transmaterial series has introduced designers to hundreds of emergent materials that have the potential to transform our built environment In our new Architecture Brief Material Strategies Brownell shows architects how creative applications of these materials achieve such transformations Chapters based on fundamental material categories examine historical precedents current opportunities and future environmental challenges Case studies featuring detailed illustrations showcase pioneering buildings from today s most forward thinking architectural firms

**Interactive Architecture** Michael Fox,2016-06-07 Recent technological developments in biology computation cybernetics engineering industrial design materials and robotics allow architecture to evolve beyond static functionality and become an active participant with the capacity to perceive react to and connect with humans and the natural world The first process based guide by Michael Fox and Miles Kemp introduced interactive architecture in 2009 and the past few years have seen its prototypical potential unleashed manifest in the eighteen inventive projects featured in this follow up the latest in our Architecture Briefs series Interactive Architecture Adaptive World illustrates how structures can process information make observations and utilize tools to translate natural systems and create seamlessly integrated environments from data driven light installations responsive sculptures and performative materials to

smart highways dynamic spaces kinetic facades and adaptive buildings Ambitious projects from around the world including Abu Dhabi Indianapolis Los Angeles New York City San Francisco Frankfurt London Paris Sochi and Zurich are illuminated by photographs diagrams and renderings    **The American Architect and Building News** ,1885    **American Architect and Building News** ,1891    **The Architect** ,1892    Architectural Record ,1996    **American Architect and the Architectural Review** ,1891    Architecture Reborn Ken Powell,Kenneth Powell,1999 Architecture Reborn is a detailed investigation into the adaptation and conversion of existing buildings as a distinctive type of architectural design In color photographs and plans here are 44 international schemes that demonstrate that reuse is a positive even imperative way to achieve a forward looking architecture Renzo Piano has transformed the legendary Fiat factory into a cultural and commercial complex a former public school in Long Island City NY has become P S 1 Institute for Contemporary Art and a 1930s factory in Detroit is now the HOPE Center for Advanced Technologies Rather than preservation or deference to old buildings the message here is transformation a physical rather than historicist approach to constructing new form from old fabric For architects students and all proponents of creative reuse this is an essential collection of case histories and an important reference in keeping up to date with this fast moving and often controversial area of design    **Building** ,1889    The Building News and Engineering Journal ,1884    **The Architecture Annual** ,2007    The Architect and Contract Reporter ,1897    **Building News** ,1883    **Journal of the Royal Institute of British Architects** Royal Institute of British Architects,1953
