Rochow,2012-11-28 Bachelor Thesis from the year 2010 in the subject Psychology Social Psychology grade 1 0 Uppsala University language English abstract In the age of social networking and music streaming playlists are a common tool for organizing sharing or exchanging music in the digital realm Most research however emphasizes mainly political legal and ethical constraints of music sharing practices yet neglects their social impact Thus this paper investigates the social psychological foundation of the playlist and analyses its functionality in establishing social relations and communication Following the theories of Cooley Mead Simmel and Solomon I conducted and analysed interviews with young Swedish men and women in which they talked about their experiences and attitudes towards playlists Moreover all participants compiled their own personal playlist based on certain personality traits which were aimed to be recognized by the others during the focus group discussion The analysis of the data yields the following conclusions The playlist is a social object facilitating new forms of communication The social nature of the playlist is based on the transformation from objective into subjective culture By internalizing new technologies such as the playlist objects gain social value thus mere musical content becomes a social form It is through sharing and exchanging musical compilations that the playlist as a social form serves as a vehicle or medium facilitating new forms of sociation and communication The communicative function of the playlist is due to its construction through emotions as uniquely subjective judgements based on the I as an emotional self feeling Thus musical compilations take part in the self construction process and can serve as a tool for the symbolic expression of the self Moreover the analysis points out that there are differences in how well certain parts of the self can be communicated by a playlist Emotional expressions of the self are translated into particular universal music patterns most successfully Furthermore the analysis shows that some people like to browse through the playlists of others and judge them thereupon which results in some type of musical voyeurism termed playlistism In conclusion I argue that the musical playlist is both socially implicated and socially implicating **Musical Genre** Mads Krogh,2025-01-09 From recent decades digitization

genre fit for current times but with the potential for also reconsidering historical cases      *Streaming Music, Streaming Capital* Eric Drott,2023-12-29 Eric Drott undertakes a wide ranging study of the political economy of music streaming to engage in a broader reconsideration of music s complex relation to capitalism      **Devaluing Public Apologies in the Age of Social Media** Joshua M. Bentley,2024-12-15 In *Devaluing Public Apologies in the Age of Social Media* Joshua M Bentley argues that apologies are losing their meaning in American society as organizations and public figures treat them as strategical tools without considering their ethical implications As the demand for apologies in the age of social media continues to increase exponentially Bentley posits the apologies that are given carry less and less weight to the public This book examines how controversial figures like Donald Trump and Joe Rogan as well as brands like Google and Bud Light have addressed public controversies both effectively and ineffectively illustrating how social media polarization and cancel culture are changing the way apologies are given and received If apologies are to serve their historical role of resolving conflict peacefully Bentley argues they must be placed back into their proper ethical context This book offers insight on how individuals and organizations can ensure their apologies reflect their authentic values Scholars of communication ethics media studies political science and public relations will find it especially useful      **Prospect** ,2009      *How to Get on Podcasts: Cultivate Your Following, Strengthen Your Message, and Grow as a Thought Leader through Podcast Guesting* Michelle Glogovac,2024-02-27 How to leverage podcast guesting to elevate yourself as a thought leader generate more revenue and promote your business all for little to no cost The explosion of social media AI enabled online advertising and the overall cacophony of the internet has made it harder than ever to connect a message with an audience One of the most powerful emerging tools for cutting through that noise is being a guest on podcasts or podcast guesting Michelle Glogovac aka The Podcast Matchmaker™ knows the impact podcast guesting has on business and brand growth She helps entrepreneurs nonprofit leaders activists experts and authors promote themselves their businesses organizations stories and expertise via podcast interviews In *How to Get on Podcasts* she teaches you how to Create unique speaking topics without being generic Define your ideal audience Design branded media kits Establish your expertise and knowledge Share yourself freely without resorting to sales tactics Tell compelling stories Repurpose your interviews into evergreen marketing content Turn every interview into a valuable business opportunity There are more than two million podcasts out of which 500 000 host expert guests a huge opportunity for leveraging a free and robust marketing tool if you have the know how With *How to Get on Podcasts* you have everything you need to increase business boost your career and brand and elevate your thought leadership potential      **Vanity Fair** ,2018      **WIPO Magazine** ,2012      [Transnational Law & Contemporary Problems](#) ,2011      **The Impact of Online Music Services on the Music Recording Industry** Daniel Wiechmann,2009-10-04 Master s Thesis from the year 2009 in the subject Communications Multimedia Internet New Technologies grade B1 University of Glasgow course Media Management language English abstract The music business is one of the few industries

that has trouble growing profits in its transition to digital Digital media downloads mobile music streams music flat rates peer to peer networks and the rise of freeconomics on the Internet are partly responsible for the reduction in CD sales in recent years The question that is most important for the industry is how the widespread of freely available content and illegal downloading can be monetised One approach to model around the main threats to the music industry is the development of online music services Thus this study is an attempt to address the issue of what are the opportunities and challenges posed by online music services for the music recording industry Referring to empirical findings of a consumer survey and expert interviews both opportunities and challenges can be identified for the music recording industry The opportunities surrounding the development of these services are encouraging Deriving from the challenges the music recording industry must ensure that online music services are a supplement to traditional ways of consumption and do not turn into a replacement of physical music consumption Concluding online music services have a small impact on the recording industry The industry might benefit from closely cooperating with online music services by learning more about consumers tastes Nevertheless the online businesses are struggling to break even and revenues from streaming will not overcome legal downloads or CD sales as major revenue stream anytime soon
