**Disruptive Business** Alexander Manu, 2016-05-23 Disruptive Business is a provocative and insightful redefinition of innovation as an outcome of human behaviour a dynamic in constant change requiring the shaping of new responses in business and the economy Alexander Manu believes that organizations must treat innovation not as a process to be managed but as an outcome that changes people's lives In Disruptive Business he explains how innovation is the moment when human behaviour is changed by a particular invention discovery or event This position challenges the current understanding of innovation as well as the current ecology in which innovation operates in organizations its management methods tools language focus and metrics The challenge extends to some of the labels currently applied to innovation typologies such as disruptive innovation seen today as addressing purely the technological side of an invention rather than the more complex motivational and behavioural side Alexander Manu considers that a disruption is not manifest in the moment a new technology is introduced The disruption is the human being and manifest only when human motivation embraces the technology and uses it to modify and improve everyday life Our acceptance and appropriation of new technologies creates the business disruption Manu makes the case that successful innovation outcomes are answers to conscious or subconscious goals residing in human motivation and motivation starts in desire This position is consistent with the history of innovations that have changed improved and reshaped human life and also consistent with their roots and ethos Humans are a perpetually wanting animal bound to desire to seek media for a better self and to need innovation In this dynamic innovation is the constant and business is the variable The role of business is to create the tools objects and services through which people can manifest what they want and who they are The book provides a new perspective of current behavioural disruptions which are relevant to the continuity of business as well as a set of practical methodologies for business design aimed at creating innovation outcomes of value to users

*Platform Neutrality Rights* Hannibal Travis, 2024-07-24 This book analyzes questions of platform bias algorithmic filtering and ranking of Internet speech and declining perceptions of online freedom Courts have intervened against unfair platforms in important cases but they have deferred to private sector decisions in many others particularly in the United States The First Amendment human rights law competition law Section 230 of the Communications Decency Act and an array of state and foreign laws address bad faith conduct by Internet platforms or other commercial actors Arguing that the problem of platform neutrality is similar to the net neutrality problem

the book discusses the assault on freedom of speech that emerges from public private partnerships The book draws parallels between U S constitutional and statutory doctrines relating to shared spaces and the teachings of international human rights bodies relating to the responsibilities of private actors It also connects the dots between new rights to appeal account or post removals under the Digital Services Act of the European Union and a variety of fair treatment obligations of platforms under American and European competition laws public accommodations laws and public utilities laws Analyzing artificial intelligence AI regulation from the point of view of social media and video platform users the book explores overlaps between European and U S efforts to limit algorithmic censorship or shadow banning The book will be of interest to students and scholars in the field of cyberlaw the law of emerging technologies and AI law **The Times Index** ,2013-04 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Time educational supplement Scotland and the Times higher education supplement **Meet Me by the Fountain** Alexandra Lange,2022-06-14

Longlisted for the Porchlight Business Book Awards A smart and accessible cultural history Los Angeles Times A portrait by turns celebratory skeptical and surprisingly moving of one of America s most iconic institutions from an author who might be the most influential design critic writing now LARB Few places have been as nostalgicized or as maligned as malls Since their birth in the 1950s they have loomed large as temples of commerce the agora of the suburbs In their prime they proved a powerful draw for creative thinkers such as Joan Didion Ray Bradbury and George Romero who understood the mall s appeal as both critics and consumers Yet today amid the aftershocks of financial crises and a global pandemic as well as the rise of online retail the dystopian husk of an abandoned shopping center has become one of our era s defining images Conventional wisdom holds that the mall is dead But what was the mall really And have rumors of its demise been greatly exaggerated In her acclaimed *The Design of Childhood* Alexandra Lange uncovered the histories of toys classrooms and playgrounds She now turns her sharp eye to another subject we only think we know She chronicles postwar architects and merchants invention of the mall revealing how the design of these marketplaces played an integral role in their cultural ascent In Lange s perceptive account the mall becomes newly strange and rich with contradiction Malls are environments of both freedom and exclusion of consumerism but also of community *Meet Me by the Fountain* is a highly entertaining and evocative promenade through the mall s rise fall and ongoing reinvention for readers of any generation **The Wall Street Journal**

Stucke,2022-06-28 Two market experts deconstruct the drivers and inhibitors to innovation in the digital economy explain how large tech companies can stifle disruption assess the toll of their technologies on our well being and democracy and outline policy changes to take power away from big tech and return it to entrepreneurs Silicon Valley s genius combined with limited corporate regulation promised a new age of technological innovation in which entrepreneurs would create companies

that would in turn fuel unprecedented job growth Yet disruptive innovation has stagnated even as the five leading tech giants which account for approximately 25 percent of the S P 500 s market capitalization are expanding to unimaginable scale and power In How Big Tech Barons Smash Innovation and How to Strike Back Ariel Ezrachi and Maurice E Stucke explain why this is happening and what we can do to reverse it While many distrust the Big Tech Barons the prevailing belief is that innovation is thriving online It isn t Rather than disruptive innovations that create significant value we are getting technologies that primarily extract value and reduce well being Using vivid examples and relying on their work in the field the authors explain how the leading tech companies design their sprawling ecosystems to extract more profits while crushing any entrepreneur that poses a threat As a result we get less innovation that benefits us and more innovations that surpass the dreams of yesteryears autocracies The Tech Barons technologies which seek to decode our emotions and thoughts to better manipulate our behavior are undermining political stability and democracy while fueling tribalism and hate But it s not hopeless The authors reveal that sustained innovation scales with cities not companies and that we as a society should profoundly alter our investment strategy and priorities to certain entrepreneurs Tech Pirates and cities infrastructure
