Comprehensive Inorganic Chemistry II, 2013-07-23 Comprehensive Inorganic Chemistry II Nine Volume Set reviews and examines topics of relevance to today's inorganic chemists. Covering more interdisciplinary and high impact areas, Comprehensive Inorganic Chemistry II includes biological inorganic chemistry, solid state chemistry, materials chemistry, and nanoscience. The work is designed to follow on with a different viewpoint and format from our 1973 work, Comprehensive Inorganic Chemistry, edited by Bailar, Emel'us, Nyholm, and Trotman-Dickenson, which has received over 2 000 citations. The new work will also complement other recent Elsevier works in this area: Comprehensive Coordination Chemistry and Comprehensive Organometallic Chemistry, to form a trio of works covering the whole of modern inorganic chemistry. Chapters are designed to provide a valuable long standing scientific resource for both advanced students new to an area and researchers who need further background or answers to a particular problem on the elements, their compounds, or applications. Chapters are written by teams of leading experts under the guidance of the Volume Editors and the Editors in Chief. The articles are written at a level that allows undergraduate students to understand the material while providing active researchers with a ready reference resource for information in the field. The chapters will not provide basic data on the elements, which is available from many sources and the original work, but instead concentrate on applications of the elements and their compounds. Provides a comprehensive review which serves to put many advances in perspective and allows the reader to make connections to related fields such as biological inorganic chemistry, materials chemistry, solid state chemistry, and nanoscience. Inorganic chemistry is rapidly developing, which brings about the need for a reference resource such as this that summarises recent developments and simultaneously provide background information. Forms the new definitive source for researchers interested in elements and their applications, completely replacing the highly cited first edition which published in 1973.

What does the sublime sound like Harmonious discordant noisy rustling silent Miranda Eva Stanyon rereads and resounds this crucial aesthetic category in English and German literatures of the long eighteenth century from a musical perspective and shows how sonorous sublimes lay at the heart of a central and transformative discourse For Enlightenment and Romantic era listeners the musical sublime represented a sonic encounter of the most extreme kind one that tested what humans were capable of feeling imagining thinking and therefore becoming The sublime and music have not always sung from the same hymn sheet Stanyon observes She charts an antagonistic intimacy between the two from the sublime's rise to prominence in the later seventeenth century through the upheavals associated with Kant in the late eighteenth century and their reverberations in the nineteenth Offering readings of canonical texts by Longinus Dryden Burke Klopstock Herder Coleridge De Quincey and others alongside lesser known figures she shows how the literary sublime was inextricable from musical culture from folksongs and ballads to psalmody polychoral sacred music and opera Deeply interdisciplinary *Resounding the Sublime* draws literature into dialogue with sound studies musicology and intellectual and cultural history to offer new perspectives on the sublime as a phenomenon which crossed media disciplines and cultures An interdisciplinary study of sound in history the book recovers varieties of the sublime crucial for understanding both the period it covers and the genealogy of modern and postmodern aesthetic discourses In *resounding the sublime* Stanyon reveals a phenomenon which was always already resonant The sublime emerges not only as the aesthetic of the violently powerful a rational or unrepresentable but as a variegated discourse with competing dissonant harmonious rustling noisy and silent strains one in which music and sound illustrate deep divisions over issues of power reason and representation
