**The Ultimate Sports Betting Secrets** A B Lawal, A. B. Lawal, 2023-06-06 Imagine if you had an Almanac with tomorrow's sports results and events Imagine what you could do if you knew the outcome before it actually happened Impossible This book teaches you how sports investing works and how you can win consistently from sports betting Sports has been my life since childhood I was trying to crunch the code to predict tomorrow's games In fact this may sound a little bit like a back to the future fairy tale but we've come as close as we can to the results of Tomorrow's Almanac I love sports betting During the last 13 years I've been gathering sports data for Major League sports like Major League Baseball Nhl Hockey the NFL football and NBA basketball We're crunching the numbers and we're comparing the stats I'm analyzing and back testing everything for years and years to crack the sports code to find those repeating patterns and trends to understand what makes teams win and what makes teams lose And you know what we found we found that history always repeats itself This is true especially in sports where the rules are strictly defined the outcomes in these situations are very predictable Of course there are lucky strikes and conditions that are impossible to put into perspective However those are very small percentages If you know the past outcome of an event you can predict the results for the game in similar circumstances with a high degree of probability As I said before the past is never a full indication of what will happen in the future and there is always room for surprises but again this is what makes sports fun to watch Am I right However what is the chance of a team with similar power and player statistics will produce a similar outcome in a similar game in similar circumstances What's that percentage 86.5% that's right An 86.5% of the cases there will be no surprises and to prediction

will come Absolutely true Our Zcode investing software is the best system in the market because it keeps making us consistent gains each and every month Truth is we love sports but we hate to gamble What we call this is sports investing which is similar to any other trading like stocks stock options and forex trades This is just way more predictable than today s flawed economic models with crisis s and bankruptcy events Every day the software is gathering thousands and thousands and thousands of sports data and results every single event every single detail every single player and every single team Then it starts the simulation with over 80 parameters in the zcode formula to come up with a precise and easy to use prediction and not only tells you who is going to win but also and most importantly where the value is which means more money can be made guessing To learn more about how you can create a consistent 1500 monthly from sports betting just order this book right now
