**Arduino: A Technical Reference** J. M. Hughes, 2016-05-16 Rather than yet another project based workbook Arduino A Technical Reference is a reference and handbook that thoroughly describes the electrical and performance aspects of an Arduino board and its software. This book brings together in one place all the information you need to get something done with Arduino. It will save you from endless web searches and digging through translations of datasheets or notes in project based texts to find the information that corresponds to your own particular setup and question. Reference features include pinout diagrams, a discussion of the AVR microcontrollers used with Arduino boards, a look under the hood at the firmware and run time libraries that make the Arduino unique, and extensive coverage of the various shields and add on sensors that can be used with an Arduino. One chapter is devoted to creating a new shield from scratch. The book wraps up with detailed descriptions of three different projects: a programmable signal generator, a smart thermostat, and a programmable launch sequencer for model rockets. Each project highlights one or more topics that can be applied to other applications.

**The Age of Surveillance Capitalism** Shoshana Zuboff, 2019-01-31 THE TOP 10 SUNDAY TIMES BESTSELLER A NEW YORK TIMES NOTABLE BOOK OF THE YEAR ONE OF BARACK OBAMA'S TOP BOOKS OF THE YEAR. Shortlisted for The Orwell Prize 2020. Shortlisted for the FT Business Book of the Year Award 2019. Easily the most important book to be published this century, I find it hard to take any young activist seriously who hasn't at least familiarised themselves with Zuboff's central ideas. Zadie Smith, The Guardian. The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called surveillance capitalism, and the quest by powerful corporations to predict and control us. The heady optimism of the Internet's early days is gone. Technologies that were meant to liberate us have deepened inequality and stoked divisions. Tech companies gather our information online and sell it to the highest bidder, whether government or retailer. Profits now depend not only on predicting our behaviour but modifying it too. How will this fusion of capitalism and the digital shape our values and define our future? Shoshana Zuboff shows that we are at a crossroads. We still have the power to decide what kind of world we want to live in and what we decide now will shape the rest of the century. Our choices allow technology to enrich the few and impoverish the many, or harness it and distribute its benefits. The Age of Surveillance Capitalism is a deeply reasoned examination of the threat of unprecedented power, free from democratic oversight. As it explores this new capitalism's impact on society, politics, business and technology, it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization. Most critically, it shows how we can protect ourselves and our communities and ensure we are the masters of the digital, rather than its slaves.

**Smart Grids** Stuart Borlase, 2017-11-22 The latest

edition features a new chapter on implementation and operation of an integrated smart grid with updates to multiple chapters throughout the text. New sections on Internet of things and how they relate to smart grids and smart cities have also been added to the book. It describes the impetus for change in the electric utility industry and discusses the business drivers, benefits and market outlook of the smart grid initiative. The book identifies the technical framework of enabling technologies and smart solutions and describes the role of technology developments and coordinated standards in smart grid including various initiatives and organizations helping to drive the smart grid effort. With chapters written by leading experts in the field the text explains how to plan, integrate, implement and operate a smart grid.
