Drinking from the Fire Hose Christopher J Frank, Paul Magnone, 2011-09-01 You re sitting in a windowless conference room Twenty minutes into the meeting the presenter finally makes it to slide four of a thirty two slide deck At least you can read this one unlike the others which were crammed with numbers graphs and charts You look around wondering if anyone else is following the

presentation Just about everyone these days suffers from information overload the 24 7 explosion from our computers smartphones media colleagues and customers Information is essential to making intelligent decisions but more often than not it simply overwhelms us It s like trying to drink from a fire hose The question isn t how to stop all those e mails meetings conference calls and fat reports that s impossible The question is what to do with them How do you find the truly essential nuggets of information and use them with confidence The solution proposed by Christopher Frank and Paul Magnone sounds deceptively simple Learn how to ask the right questions at the right time Whatever field you re in asking smarter questions will expose you to new information point you to connections between seemingly unrelated facts and open new avenues of discussion with your colleagues The authors explain the seven questions that can help you bring a big picture perspective to problems that often leave others buried in irrelevant details And they show through real life case studies including Trader Joe s Starbucks Kodak Microsoft iRobot and IBM how their method can have a dramatic impact It really is possible to convert the fire hose of information into useful insights Consider a nonbusiness example the 2010 Icelandic volcano eruption that sent a giant ash cloud toward Europe Tens of thousands of flights were canceled and five million passengers stranded leading to billions in economic losses Europe s best scientists generated oceans of data and carefully modeled the cloud s dispersion pattern But no one could answer the essential question Was the concentration of volcanic ash in the air enough to damage a jet engine Without that key answer all the carefully gathered facts were useless to the decision makers Once you adopt the seven questions you ll start having more productive brainstorming sessions You ll answer critical questions faster and find unexpected solutions to important problems And you ll get better at communicating to your colleagues with more clarity and focus turning down the fire hose that other people have to cope with InCider, 1992 *STATS Major League Handbook*, 1997 Bill James, 1996-11 The most respected statistical book on the major leagues available today this handbook offers everything true baseball fans want and need including complete career pitching and hitting stats for every 1996 player 1997 hitter and pitcher projections managerial performances and more STATS Major League Handbook, 1998 Stats Publishing, Bill James, 1997-11 Now in its ninth year Bill James s legendary Handbook offers everything the true baseball fan wants and needs including complete career pitching and hitting stats for every 1997 player managerial performances and tendencies and more **STATS Diamond Chronicles, 1998** John Sickels, Stats Publishing, 1998-02 *STATS Diamond Chronicles* presents essays debates and discussion from the 1997 baseball season as authored by some of the most popular baseball minds in the business Focusing on hot topics from this past season the guide also presents information and insight from the 1997 98 off season getting baseball fans totally prepared for Major League Baseball 1998 **Fortune** Henry Robinson Luce, 2006 **Economics is Like Sex** Jonathan M.
