*Transition Guide to Microsoft Office 2007* Prentice Hall, 2007. Explore the new features of Microsoft Office 2007. Microsoft Office 2007 introduces many new features to help you get your work done more efficiently and effectively. By far, the biggest change in Office 2007 is the new user interface. A user interface, which is what you see on the screen when you are using software, provides a way for you to interact with software and tell it what tasks you want to perform. With Office 2007, Microsoft has streamlined the user interface so that you can more quickly and easily locate program features and complete tasks. The most noticeable user interface change in Office 2007 is the replacement of the traditional menus and toolbars with the Ribbon, which groups commands in a way that corresponds directly to the way people work. The Ribbon works along with galleries and the Live Preview feature to present you with graphical examples of formatting results to help eliminate the time wasted on trial and error. The KeyTips feature allows users to invoke commands with just a few simple steps. This *Transition Guide to Microsoft Office 2007* is designed to introduce you to the new Office 2007 user interface components.
