Las aguas indígenas en Chile Nancy Yáñez, Raúl Molina, 2011 Este libro entrega antecedentes que evidencian que prácticamente todos los conflictos ambientales referidos a empresas extractivas de recursos naturales en Chile involucran cuestiones críticas en relación con los recursos hídricos Al igual que en otros países de América Latina parte importante de estos proyectos públicos o privados se ejecutan en tierras de propiedad indígena o que las comunidades indígenas reivindican como propias También impactan espacios territoriales de uso y aprovechamiento de otras comunidades locales pescadores artesanales campesinos o villorrios rurales De esta manera el modelo extractivo de recursos naturales que impera en el país sustrae del control territorial de las comunidades indígenas y locales recursos de uso ancestral particularmente agua sobre los que se han estructurado las economías indígenas desde tiempos inmemoriales y que han garantizado la preservación de sus culturas En consecuencia lo que se concluye tras este análisis es que la confiscación de las aguas indígenas pone en riesgo la existencia misma de las comunidades indígenas es decir sus actividades productivas tradicionales y finalmente su presencia en espacios territoriales marítimos y terrestres donde tras el desecamiento o la pérdida de las fuentes de agua se hace inviable el desarrollo de sus estrategias económicas sociales

y culturales tanto las tradicionales como las que en la actualidad forman parte de sus prioridades en materia de desarrollo El Estado hace caso omiso del hecho irrefutable de que las aguas en disputa son indispensables para asegurar el proyecto de desarrollo indígena y su prosecución por parte de las generaciones futuras

En esta tesis se analizan las manifestaciones religiosas de los navegantes durante el mundo griego antiguo Mediante el análisis de los exvotos como expresiones materiales de la religiosidad de los marineros así como a través del estudio de los espacios santuarios y los tiempos fiestas religiosas en los que se manifiesta su piedad es posible observar que en primer lugar la religiosidad de los navegantes se adapta a las formas de expresión religiosa de su comunidad de origen En segundo lugar que también se adapta a las expresiones religiosas de los cuerpos cívicos con los que entr en contacto Y en tercer lugar el transcurso y las vicisitudes de su actividad económica generaron unas manifestaciones religiosas propias dependientes además de un factor que no afectaba a los restantes grupos sociales el miedo al mar Estas tres variables condicionaron el nacimiento de una religiosidad más permisiva con expresiones propias como por ejemplo los exvotos afines a la actividad náutica anclas barcos obernalles Asimismo nació un folclore marino que ubicó en lugares donde la travesía era más peligrosa un conjunto de fantasmagóricas amenazas
