fitness world by storm in the last few years it's Pilates. Everyone is doing it from dancers to footballers and the benefits are said to be as much mental as they are physical. Pilates is a physical fitness system developed in the early 20th century by Joseph Pilates in Germany. As of last year there are 11 million people who practice the discipline regularly and 14 000 instructors in the United States only. Pilates called his method Contrology because he believed his method uses the mind to control the muscles. The program focuses on the core postural muscles which help keep the body balanced and which are essential to providing support for the spine. In particular Pilates exercises teach awareness of breath and alignment of the spine and aim to strengthen the deep torso muscles. Pilates encourages you to think about how you perform everyday movements. It heightens your body awareness which in turn improves your overall agility, flexibility and strength. It helps you ensure your body is working at its optimal level all the time. What are the benefits? Muscle tone increased, strength and flexibility and improved overall mobility and precision at which you move. It's perfect for people who like a meditative element in their exercise regimes.
