*Military Diplomacy in the Dual Alliance* Tim Hadley, 2015-12-24 This book challenges current thinking about the outbreak of World War I and the course of German foreign policy since Bismarck's chancellorship. In 1914 Germany's opening offensives against France were to be accompanied by a simultaneous offensive by her ally Austria-Hungary against Russia. The Austrian offensive was intended to hold the Russians until Germany defeated the French six weeks no more. Then the German army would turn east to support the Austrians. The Austrian offensive was a catastrophic failure. After only days of fighting, Russia Germany was obliged to send troops to support Austria lest she capitulate while most of the German army was still in France. The Austrian army's severe deficiencies were a constant drain on the German effort throughout the war. After the war German memoirists and historians claimed that the German leadership had been unaware of these deficiencies before the war broke out. These claims have been accepted by historians down to today. The book presents recently re-discovered documentary evidence that the German general staff and Germany's political leadership had known of the Austrian army's weaknesses for decades before the war. The book also reveals a new perspective of Bismarck's diplomacy beginning shortly after he engineered the Dual Alliance between the two countries in 1879. It demonstrates that as early as 1882 Bismarck became aware that the Austrian army was far weaker than assumed when he concluded the alliance. It was primarily his concern about Austria's weakness that spurred Bismarck's energetic diplomacy seeking alliances and understandings with other countries in the region and which became the main consideration that guided his foreign policy from then on. For if Austria suffered a defeat, Germany would find itself alone between two dangerous powers France and Russia. The consequences of his policies resulted in peace down to his departure in 1890. His successors for a variety of reasons addressed in the book were not as careful, ignored Austria's weaknesses despite the warnings of the military attachés and permitted Austria to become involved in a war. The result was tragically foreseeable.

**Defense Engagement since 1900** Greg Kennedy, 2020-05-20

There is more to defense than military might and more to the military than a fighting force. At a moment of global upheaval domestic turmoil and political uncertainty this timely volume seeks to define and reframe the terms of defense engagement the use of military capabilities to exert soft power influence as opposed to hard power military force. *Defense Engagement since 1900* is a work of applied military history that brings lessons of the past to bear on current issues. In a number of case studies spanning the twentieth century and the globe the authors explore various dimensions of defense engagement. Their work which attempts to recast the role of a state's military from wielder of force to employer of power is squarely aimed at tackling the causes of designated security threats and not merely managing their consequences. The chapters by scholars and practitioners representing diverse points of view focus primarily on the British experience perhaps the most extensive example of the use of military power in a nonmartial fashion in pursuit of policy goals. However the chapters also consider events in the United States Canada Japan the Middle East and Africa. Intelligence diplomacy deterrence alliances coalitions and networks all are within the authors scope as they address the need to use a wide range of attributes and capabilities associated with military power in various contemporary conflicts and national security strategies. The understanding their work provides will prove critically important to strategic thinkers of our day as democratic states increasingly contend with hybrid subthreshold and Gray Zone warfare.
