Montessori Great Lessons:

The Montessori Great Lessons Guadalupe Reyes Vadillo, 2021-03-16 The Montessori Great Lessons are a series of stories through which children are presented with the basic structure of the topics they will develop during their academic training in Workshop equivalent to elementary school Workshop 1 includes grades 1 to 3 and Workshop 2 the grades 4 to 6 and allow a first approach to the holistic approach of the Montessori philosophy by showing us an interrelation of essential topics that shows us that every aspect of the knowledge of the world has contacts with everything else Maria Montessori's Philosophy Patrick R. Frierson, 2025-02-27 Maria Montessori's Philosophy shows how Montessori's commitment to follow the child can be understood as a philosophical method for answering the great philosophical questions that confront human beings Patrick Frierson discusses historical influences on Montessori's philosophical views focusing on showing how her commitment to children led her to profound insights about a wide range of philosophical questions from foundational metaphysics to applied ethics and politics Her metaphysics grounded in the concept of life as she observes it developing in the child helps to address fundamental questions about the nature of the universe and the emergence of consciousness and value within it Her pragmatic empiricist epistemology provides the framework for a sophisticated account of various intellectual virtues conducive to excellent cognitive engagement with reality Her moral philosophy weaves together a broadly Nietzschean emphasis on self-perfection with respect for all human beings and a strong interest in social solidarity In her philosophy of religion she follows children as they guide her to recognize a sense for the divine and the importance of sensorily informed religious practice Her politics informed by lifelong feminism and concern for peace shows how the education of the child is the key to cosmopolitan solidarity and lasting peace Her philosophy of technology while recognizing the dangers of technological development also sees in children the human potential and even vocation to develop technology for the betterment of the world **Teaching Children** Ann El-Moslimany, 2018-01-01 The author explores education from the essential principles of Tawhid Oneness of God humanity knowledge fitrah concept of human nature and the role of humans as vicegerents of God on earth responsibility and stewardship The current education system dates back a hundred years or more and is in desperate need of a reboot In developing the industrialized society the education system itself became like a factory the end product being pupils who merely regurgitate facts and themselves end up as cogs in the machine that is the wider industrial complex The legacy of this is a soulless functional educational system that fails to develop pupils to meet the present and future needs of individuals and their expectations This failure inevitably impacts on society and humanity at large Society has long since moved beyond the industrial revolution and into an age of global connectedness where the sum of human knowledge is freely available via the internet It is an age where people are generally more well informed and on a variety of issues An effective holistic educational philosophy is required one that gives full spiritual meaning to all that a child learns It should equip children with spiritual awareness morals and values social responsibility and accountability self

Maria Montessori's Erdkinder Ela Eckert,2022-10 Adolescents need a school that is not a school This claim by Maria Montessori dating from the 1930s is increasingly shared today Consistently based on the developmental needs in adolescence Maria Montessori designed the concept of a Center for Study and Work in the Countryside for students aged 12-18 years which gives young people the opportunity to learn about the basic structures of production trade and services in a manageable transparent and at the same time protected setting through Practice Theory linked experiences The book presents the basics of Maria Montessori's concept and gives through reports with practitioners and interviews with Montessori experts insights into authentic implementations of the Farm school concept and thus into a learning arrangement that allows young people a high degree of responsibility and participation and strengthens their commitment to a sustainable approach to natural resources and a peaceful way of living The book also addresses schools without a Farm school practice and shows ways of approaching crucial components of this authentic and highly topical concept
