Cytowic,2024-10-01 An award winning neurologist on the Stone Age roots of our screen addictions and what to do about them The human brain hasn t changed much since the Stone Age let alone in the mere thirty years of the Screen Age That s why according to neurologist Richard Cytowic who Oliver Sacks observed changed the way we think of the human brain our brains are so poorly equipped to resist the incursions of Big Tech They are programmed for the wildly different needs of a prehistoric world In *Your Stone Age Brain in the Screen Age* Cytowic explains exactly how this programming works from the brain s point of view What he reveals in this book shows why we are easily addicted to screen devices why young developing brains are particularly vulnerable why we need silence and what we can do to push back In the engaging storytelling style of his popular TED Talk Cytowic draws an easily comprehensible picture of the Stone Age brain s workings the function of neurotransmitters like dopamine in basic instincts for survival such as desire and reward the role of comparison in emotion and emotion in competition and most significantly the orienting reflex one of the unconscious circuits that automatically focus shift and sustain attention Given this picture the nature of our susceptibility to digital devices becomes clear along with the possibility of how to break their spell Full of practical actions that we can start taking right away *Your Stone Age Brain in the Screen Age* offers compelling evidence that we can change the way we use technology resist its addictive power over us and take back the control we have lost **333 Journal Pages** Linda Wright,2018-02-05 In memory of my husband James A Wright I have written this book of 333 journal pages For each entry I have selected a Bible verse for you to reference or study and then some of my thoughts on the topic at hand After a short prayer there is room for your thoughts and ideas I love to journal and I pray you will join me in loving it too Discover why this book is titled 333 Journal Pages in my introduction and Journal Page 1 **An Age of Accountability** John L. Rury,2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to

challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree
