Relapse Prevention and Recovery Promotion in Behavioral Health Services , Health Promotion in the Universities and Other Educational Settings Miguel Corbí, Antoni Aguiló, Carmen Gallardo Pino, Mario Del Libano, Carlos Emanuel Rodríguez-Díaz, Hiram V. Arroyo Acevedo, 2025-09-17 The promotion of health in universities is of great importance as it allows for the encouragement of healthy lifestyles and the prevention of diseases among students, teaching staff and administrative personnel. The university is a conductive environment for the promotion of healthy habits since firstly it is usually the moment when the students make decisions under their responsibility and secondly it is a place where academic sports and social activities take place so it is also an ideal moment to promote changes that can be transferred to society and the rest of the individual's life. Health promotion in universities can cover several areas such as healthy eating, physical exercise, prevention of addictions, emotional and social mental health among others. It can also involve the entire university community from students to administrative and teaching staff. In the case of students, it is essential as it is a period of change and habit formation and the fact that they will be the future decision makers of society.

Sustainable Health Promotion Practices and the Global Economy Ben Y. F. Fong, Wang-Kin Chiu, 2024-10-15 This book reviews the strategies for the development of sustainable health promotion practices including the Sustainable Development Goals (SDGs) with case examples from the COVID 19 pandemic. Beginning with a historical survey of the global agenda of health promotion over the past decades, the book analyses the evolving standards, goals, and strategies of health promotion as well as the challenges encountered in implementing health promotion practices during the COVID 19 pandemic. Both social and environmental determinants of population health are examined here. Contributors have assessed socio-economic inequalities present in health promotion practices and highlighted the need for balance between economic development and financial sustainability in health services and educational programming. A framework for improved lifelong population health for all is also suggested. This review of social, economic, environmental, and ecological contexts in health promotion will be of interest to policymakers, academics, and practitioners. In particular, scholars of health policy and health promotion as well as public administration and development studies will find this a useful volume.
