**Microsoft Dynamics GP Workflow 2.0** Ian Grieve, 2015-06-01

Microsoft Dynamics GP is a popular enterprise resource planning ERP application used by tens of thousands of sites around the world to keep the accounting financial distribution and manufacturing functions running day in and day out. Dynamics GP includes a variety of tools and modules to assist in controlling processes and data one of the major modules for this was the Dynamics Workflow module. However this module had major flaws which very much limited its usefulness it was slow clunky and difficult to install configure and maintain. As of Microsoft Dynamics GP 2013 R2 this Workflow module has been replaced.

with a new one Workflow 2.0. This new module lives entirely within Dynamics GP itself thereby removing the dependency on SharePoint; this has the dual benefit of making Workflow 2.0 easy to setup, configure workflow processes and maintain on an ongoing basis. This book introduces the concepts of workflow and moves onto Workflow 2.0. It covers the creation of both simple and complex document based workflow processes, a non-document based workflow, how users interact with the workflow process including email notifications and email actions before wrapping up with a step by step install and verification of the Web Services for Microsoft Dynamics GP.
