**Information Fusion and Geographic Information Systems** Vasily V. Popovich, Manfred Schrenk, Christophe Claramunt, Kyrill V. Korolenko, 2009-04-30 This volume contains the papers presented at the International Workshop Information Fusion and Geographic Information Systems IF GIS 09 held in St Petersburg Russia in May 2009. The workshop was organized by the St Petersburg Institute for Informatics and Automation of the Russian Academy of Sciences SPIIRAS. The workshop continues a series organised biannually and attracts academics and industrials from a wide range of disciplines including computer science, geography, statistics, mathematics, hydrography, geomorphology and environmental sciences. The objective of this workshop is to provide a forum for innovative research oriented towards Geographic Information Science and technologies and Corporate Information Systems whose close association highlight novel theoretical and practical challenges. The papers selected by the International Program Committee cover a wide range of innovative areas including ontological and semantic approaches for the representation of geographical data, geographical data monitoring, situation management and forecast to emerging applications oriented to the maritime environment, disaster management and security threats. While traditional topics of GIS conferences are well represented and still being advanced, several new domains appear and stress the need for the development of versatile monitoring systems and decision making systems. While GIS already have a de facto standard for geographical monitoring and analysis, the papers accepted in this volume also illustrate several novel directions of application whose objective is more closely oriented to process modeling and decision making and where the nature of the objects represented is revisited using ontological and semantic approaches

*The Adventurous and Practical Journey to a Large-Scale Enterprise Solution* Vahid Hajipour, 2023-03-16 The high failure rate of enterprise resource planning (ERP) projects is a pressing concern for both academic researchers and industrial practitioners. The challenges of an ERP implementation are particularly high when the project involves designing and developing a system from scratch. Organizations often turn to vendors and consultants for handling such projects but every aspect of an ERP project is opaque for both customers and vendors. *Unlocking the mysteries of building a large scale ERP system: The Adventurous and Practical Journey to a Large Scale Enterprise Solution* tells the story of implementing an applied enterprise solution. The book covers the field of enterprise resource planning by examining state of the art concepts in software project management, methodology, design and development, integration policy and deployment framework, including: A hybrid project management methodology using waterfall as well as a customized Scrum based approach; A novel multi tiered software architecture featuring an enhanced flowable process engine; A unique platform for coding business processes efficiently; Integration to embed ERP modules in physical devices; A heuristic based framework to successfully step into the Go live period. Written to help ERP project professionals, the book charts the path that they should travel from project ideation to systems implementation. It presents a detailed real life case study of implementing a large scale ERP and uses storytelling to

demonstrate incorrect and correct decisions frequently made by vendors and customers Filled with practical lessons learned the book explains the ins and outs of adopting project methodologies It weaves a tale that features both real world and scholarly aspects of an ERP implementation
