Teaching Challenges in Secondary Schools Alyssa R. Gonzalez-DeHass,Patricia P. Willems,2017-09-13 This case study book serves as a valuable tool for professors and instructors of educational psychology It contains 17 cases that represent current areas of interest in Educational Psychology embedded within current challenges that teachers face in today s middle and high school classrooms The cases are organized into six major parts Human Development Individual Differences and Diversity Learning Theories Motivation Classroom Management Instructional Approaches and Assessment and Evaluation Each case describes a detailed teaching scenario written from either the student or the teachers perspective To engage students in critical thinking perspective taking analysis problem solving and decision making the cases have been intentionally written without a conclusion Because the cases are open ended it allows the professor or instructor more flexibility and autonomy in how they use the cases Each case is followed by thought provoking questions highlighting the significant issues in the case from which to analyze the case and apply various theoretical viewpoints While the cases do not replace actual classroom experience they present a way to immerse students in the classroom s culture by providing them with real life teaching examples

Extending the Challenge in Mathematics Linda Jensen Sheffield,2002-10-22 The best source I have seen challenging mathematically talented students The activities are thought provoking and enjoyable I will recommend this book to parents as well as educators of mathematically talented students Sally Reis Past President of The National Association for Gifted Children Challenge engage and inspire your mathematically promising students Combining theory and practice Sheffield expertly guides the reader through the process of mathematical talent development from identifying students with mathematical potential to finding and creating first rate problems for exploration and strategies for assessment The multi level investigations in this book are designed to challenge students and inspire deeper and more original mathematical thinking in Number and Operations Algebra Geometry and Measurement and Data Analysis and Probability Each investigation is developed in the following easy to follow format Relate sets the stage for the investigation by connecting it to prior learning and the NCTM Principles and Standards Investigate poses the initial problem to start students thinking about the investigation Evaluate and Communicate provides solutions probing assessment questions and suggestions for teacher

responses Create offers ideas for extending and deepening the investigation allowing even the most accomplished students to add depth and complexity to their reasoning Discussion gives teachers hints on what to look for in student solutions as well as ideas for encouraging students to dig more deeply into the mathematical concepts that are presented Mathematically promising students have the potential to become the leaders and problem solvers of the future Extending the Challenge in Mathematics provides the practical tips and tools educators need to help their students develop this potential to the fullest
