**North American Agroforestry** Harold E. Gene Garrett, Shibu Jose, Michael A. Gold, 2021-12-29. North American Agroforestry. Explore the many benefits of alternative land use systems with this incisive resource. Humanity has become a victim of its own success. While we've managed to meet the needs to one extent or another of a large portion of the human population, we've often done so by ignoring the health of the natural environment we rely on to sustain our planet. And by deteriorating the quality of our air, water and land, we've put into motion consequences we'll be dealing with for generations. In the newly revised Third Edition of North American Agroforestry, an expert team of researchers delivers an authoritative and insightful exploration of an alternative land use system that exploits the positive interactions between trees and crops when they are grown together and bridges the gap between production agriculture and natural resource management. This latest edition includes new material on urban food forests as well as the air and soil quality benefits of agroforestry, agroforestry's relevance in the Mexican context, and agroforestry training and education. The book also offers a thorough introduction to the development of agroforestry as an integrated land use management strategy. Comprehensive explorations of agroforestry nomenclature, concepts and practices as well as an agroecological foundation for temperate agroforestry. Practical discussions of tree-crop interactions in temperate agroforestry, including in systems such as windbreak practices, silvopasture practices and alley cropping practices. In-depth examinations of vegetative environmental buffers for air and water quality benefits, agroforestry for wildlife habitat, agroforestry at the landscape level and the impact of agroforestry on soil health. Perfect for environmental scientists, natural resource professionals and ecologists, North American Agroforestry will also earn a place in the libraries of students and scholars of agricultural sciences interested in the potential benefits of agroforestry.
